In the original publication [1], the Institutional Review Board Statement and Informed Consent Statement were given as "Not applicable", which was not correct. Now, we have added the following text to the **Institutional Review Board Statement** and **Informed Consent Statement**:

Institutional Review Board Statement: This study used anonymous, non-identifiable survey data and involved no interaction or intervention with human subjects. Pursuant to Article 5 of the Human Subjects Research Act of Taiwan and the MOHW Announcement (Ref. No. 1010265075, 5 July 2012), this study falls within the exempt categories; therefore, Institutional Review Board approval was not required. The research was conducted in compliance with the ethical standards of Chaoyang University of Technology and the Taiwanese government.

Informed Consent Statement: Informed consent was obtained from all participants prior to data collection.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
