Table S1. Numbers of psychiatric disorders in the tracking of 16 years among the acute mountain sickness cohort and the control group.

AMS	With (n = 127)	Without (n = 1270)	Log-Rank Test *p*
In the Tracking of x year(s)	**Numbers of Psychiatric Disorders**		
1	21	11	<0.001
2	29	29	<0.001
3	31	48	<0.001
4	36	55	<0.001
5	39	71	<0.001
6	40	82	<0.001
7	41	94	<0.001
8	43	97	<0.001
9	44	103	<0.001
10	44	110	<0.001
11	46	114	<0.001
12	48	122	<0.001
13	49	130	<0.001
14	49	134	<0.001
15	49	139	<0.001
16	49	140	<0.001

There was a significant difference of cumulative survival between the two cohorts in the psychiatric disorders (log-rank test, $p < 0.001$). Abbreviations: AMS, Acute Mountain Sickness.
