Title Correction

In the original publication [1], the paper title did not reflect the research presented appropriately. Thus, the title of the manuscript has been adjusted to "Influence of Nano-Powder-Mixed Die-Sinking Electrical Discharge Machining Parameters on Material Removal, Tool Wear, and Surface Integrity of Nitinol Shape Memory Alloy".

There was an error regarding the affiliation of Dr. Sakshum Khanna. The previous Affiliation 2, "Journal of Visualized Experiments, Delhi 110016, India", should be updated to "School of Technology, Pandit Deendayal Energy University, Raisan, Gandhinagar 382007, India".

Error in Figure Legend

In the original publication [1], there was a mistake in the legend for Figure 3. The correct legend appears below:

Figure 3. Analysis of alumina nano-powder: (**a**) X-ray diffraction spectra, (**b**) Raman profile, and (**c**,**d**) FESEM with EDX analysis (adapted from Ref. [41]).

References

The reference originally listed as Reference 54 has been renumbered as Reference 41; with this correction, the order of some references has been adjusted accordingly.

Additionally, Mr. Parth Prajapati was mistakenly omitted from the Acknowledgements statement despite his contribution to the work. A new Acknowledgments statement has therefore been added as follows:

Acknowledgments: The authors gratefully acknowledge Parth Prajapati for his contribution to the development of the methodology adopted in this work.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
