

Supplementary materials

Figure S1. Results of cytometric live (green) /dead (red) test in hPBMCs incubated with pectin gel beads.

(A) Control

(B) CaPG beads

(C) ZnPG beads

(D) FePG beads

(E) AIPG beads

Figure S2. Monolayer of human fibroblasts incubated with pectin gel beads.

(A) Control

(B) CaPG beads

(C) ZnPG beads

(D) FePG beads

(E) AIPG beads
