S1: Interview questions for TOD, Can Tho

Thank you for taking time to answer the following questions for me.

In order to make some questions clear, I will briefly explain the research to you.

My study focuses on the relationship between the citizen's perception and the citizen's engagement in public transport in the TOD environment. Within the TOD concept, there are various possibilities in terms of aspects that affect citizens' willingness to engage in public transport. This discussion aims to confirm the list of measurement items from the literature review and explore the specific factors in the context of a developing country.

1. What do you perceive of Sustainable Mobility?
2. Do you think it is important for Can Tho to pursue Sustainable Mobility? Why?
3. Can Tho is a growing city. Which issues regarding the Sustainable Mobility concept are the most important to develop, and how can this be achieved in such a growing city?
4. Do you think one of the biggest challenges for Can Tho to achieve Sustainable Mobility is to improve the infrastructure system and to stimulate the usage of more sustainable types of transport?
5. There is a specific TOD precinct plan in Can Tho?
6. What aspects of the TOD concept make the citizen willing to engage in public transport in Asian countries, and Can Tho, in particular?
7. Which aspects are most important for the TOD concept?
8. In your opinion, which benefits of TOD as well as public transport will attract the citizens to use public transport?
9. Do you have any suggestions or recommendations for me regarding the research, the TOD concept, documents that might be relevant or relevant persons to get in touch with?
10. Do you think the measurement items in the list below can affect citizens' perception in the context of Can Tho?
11. Are there any measurement item in the list below that might need some reconsideration according to you, and if so, why?

Measurement items	**Yes**	**No**
TOD provides mobility choices		
TOD can help increase disposable income		
TOD can help save time because it eases traffic congestion		
TOD can contribute to more affordable housing		

TOD can offer a safer means by public transport		
TOD can help release the stress from not needing to find a parking slot.		
TOD can help reduce air pollution		
TOD can help reduce oil consumption rates		
TOD can help conserve land resources and open spaces.		
TOD can provide a comfortable trip		
TOD can help the users having more time to enjoy life (reading a book, listening to music, chatting...) while traveling by public transport		
TOD can help the users having a healthier life by walking as an exercise from the stations to the destinations		
Public transport is an easy-to-use system		
The process to use public transport is simple		
The payment method is simple		
Using public transport is a status symbol for modern citizens.		
It is a wise choice to use public transport		
Public transport is suitable for everyone		

S2: Questionnaire

The questionnaire included below focuses on the citizen's perceptions of the Transit-Oriented-Development (TOD) concept in Can Tho City. The willingness of Can Tho citizens to use public transport in the TOD environment was analysed based on the citizen's perception of 3 aspects, the local Government's capacity, the usefulness of TOD, and public transport.

Part 1: Perceived the capacity of the local Government

The numbers indicate that 1 =bad, 2=relatively bad, 3= average, 4=relatively good, 5=excellent.

How is your perception of the capacity of the Local Government?

1. Smart growth is very important for Can Tho?

① ② ③ ④ ⑤

2. To what extent does Can Tho priority on investing in smart mobility and infrastructure?

① ② ③ ④ ⑤

3. If you grade Can Tho, what value do you attach to Can Tho?

① ② ③ ④ ⑤

4. To what extent does Can Tho incorporate sustainable energy consumption?

① ② ③ ④ ⑤

5. To what extent does Can Tho incorporate accessible public transport?

① ② ③ ④ ⑤

6. To what extent for the specific TOD precinct plan in Can Tho?

① ② ③ ④ ⑤

7. To what extent does Can Tho coordinate land use planning to provide incentives for TOD investments?

① ② ③ ④ ⑤

8. To what extent does Can Tho encourage TOD by active public-private partnership?

① ② ③ ④ ⑤

9. To what extent does Can Tho take action towards sustainable?

① ② ③ ④ ⑤

10. To what extent does Can Tho offer policies relate to sustainable development?

① ② ③ ④ ⑤

Part 2: Perceived Usefulness of TOD

The numbers indicate that 1= Strongly Disagree, 2= Disagree, 3= Neither Agree nor Disagree, 4=Agree, 5= Strongly Agree

TOD is a kind of sustainable development near transit. A successful TOD creates beautiful, vital, and walkable neighborhoods; provides housing, shopping, and transportation choices; generates lasting value for citizens and public and private stakeholders; and provides access to the region's jobs, government centers, healthcare facilities, and cultural and recreational destinations.

How much do you agree with the following statements relating to your perception of the usefulness of TOD?

	1	2	3	4	5
TOD provides mobility choices.					
TOD can help increase disposable income.					
TOD can help save time because it eases traffic congestion.					
TOD can contribute to more affordable housing.					
TOD can offer a safer means by public transport.					
TOD can help release the stress from not needing to find a parking slot.					
TOD can help reduce air pollution					
TOD can help reduce air pollution.					
TOD can help conserve land resources and open spaces.					
TOD can provide a comfortable trip.					
TOD can help the users having more time to enjoy life (reading a book, listening to music, chatting...) while traveling by public transport.					
TOD can help the users having a healthier life by walking as an exercise from the stations to the destinations.					

Part 3: Attitude towards using Public Transport

How much do you agree with the following statements relating to your perception of Public Transport usage?

	1	2	3	4	5
