Table 1. K-CPT outcomes description.

	Definition	*Type of variable*	*Expressed in*
Omission errors	The failure to respond to targets (everything except the soccer ball picture)	Discrete	Number of times (n)
Commission errors	Responses given to non-targets (the soccer ball picture)	Discrete	Number of times (n)
Hit reaction time [HRT]	The average speed of correct responses for the entire test.	Continuous	Milliseconds (ms)
Standard error of the hit reaction time [HRT(SE)]	A measure of response speed consistency.	Continuous	Milliseconds (ms)
Detectability or attentiveness [d']	A measure of the ability to distinguish between targets (everything except the soccer ball picture) and non-targets (the soccer ball picture).	Continuous	No units

Own elaboration from MHS K-CPT test items and normative data.
