

Supplementary Materials

Figure S1A: Forest plot for sensitivity and specificity of IVC-CI for diagnosis of PIH.

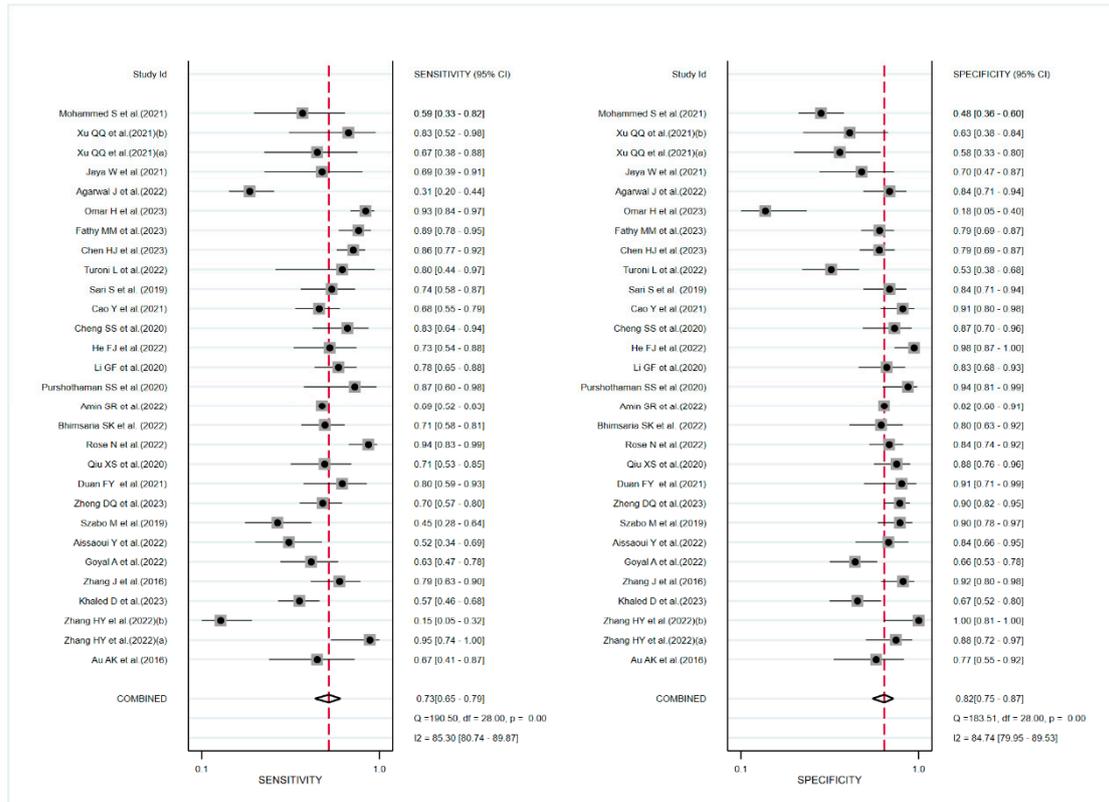

Figure S1B: Forest plot for sensitivity and specificity of DIVCmax for diagnosis of PIH.

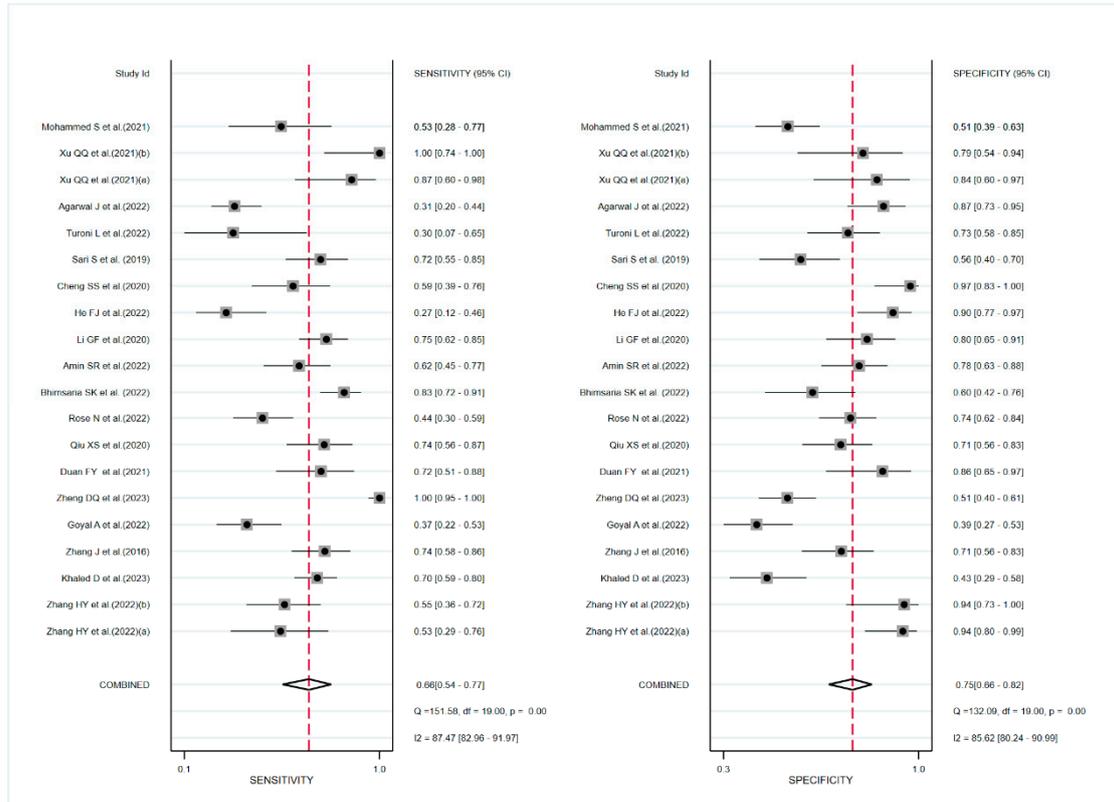

Figure S1C: Forest plot for sensitivity and specificity of DIVCmin for diagnosis of PIH.

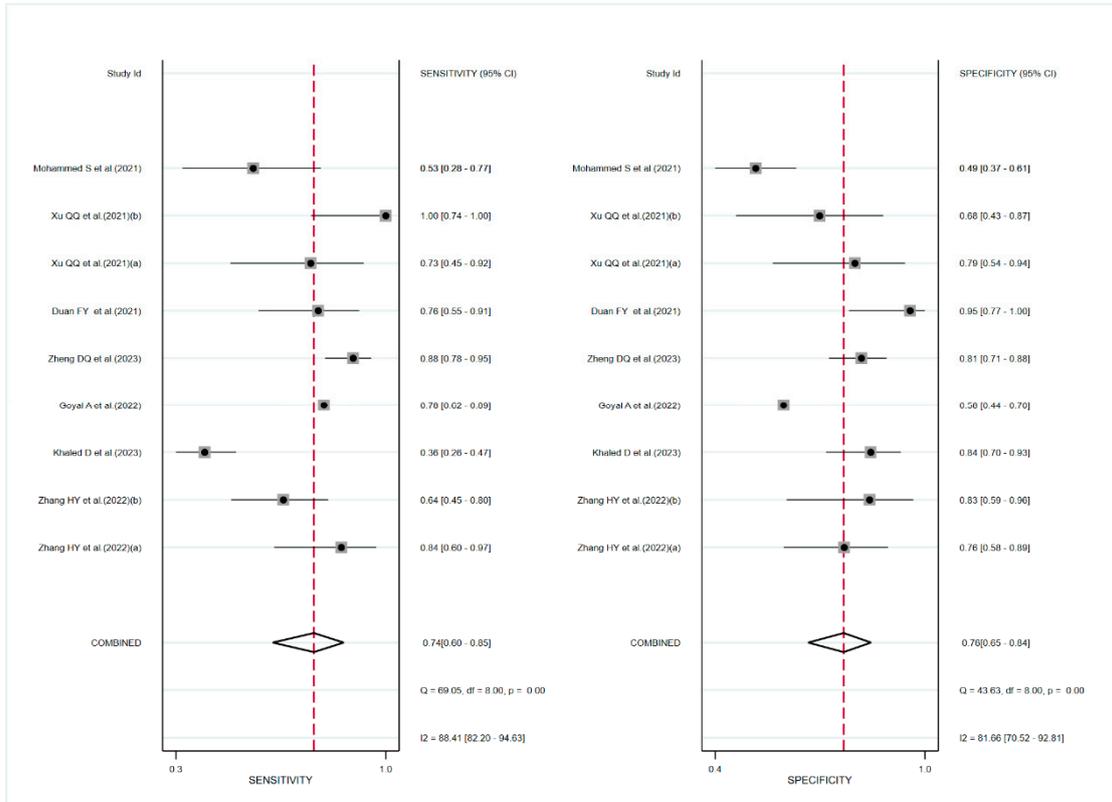

Figure S1D: Forest plot for sensitivity and specificity of carotid artery FTC for diagnosis of PIH.

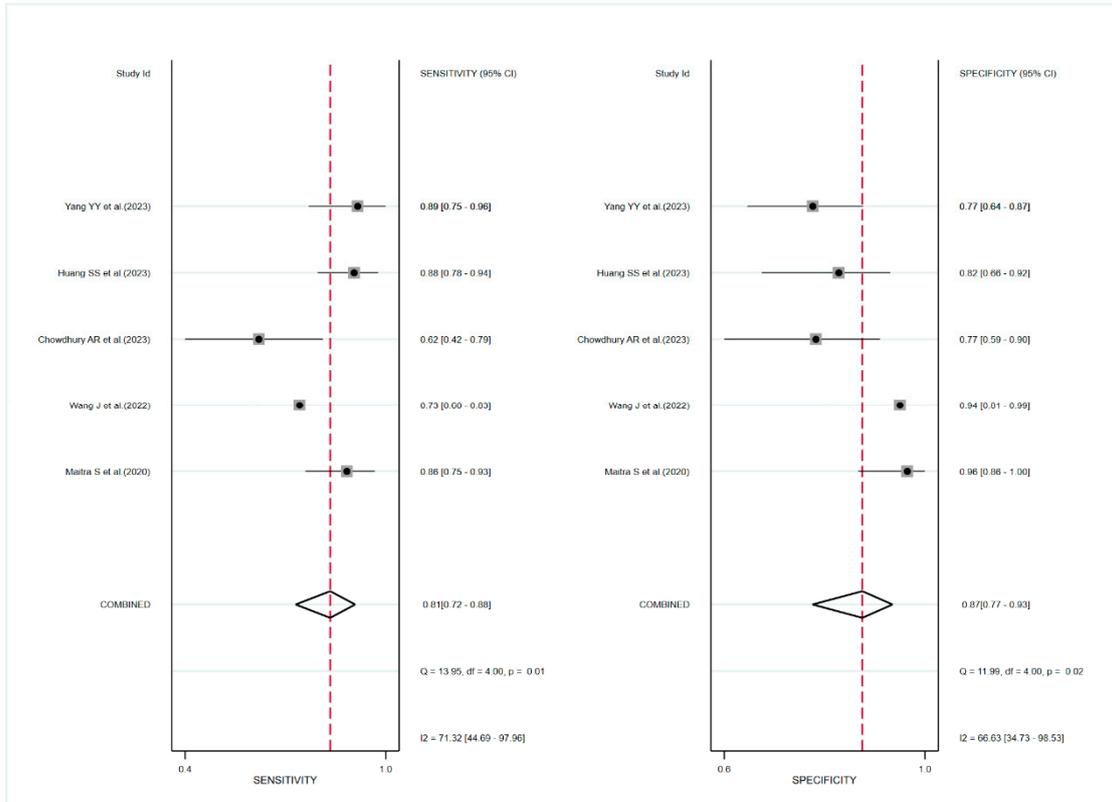

Figure S2A: Forest plot for the mean difference of IVC-CI between patients with PIH and without PIH.

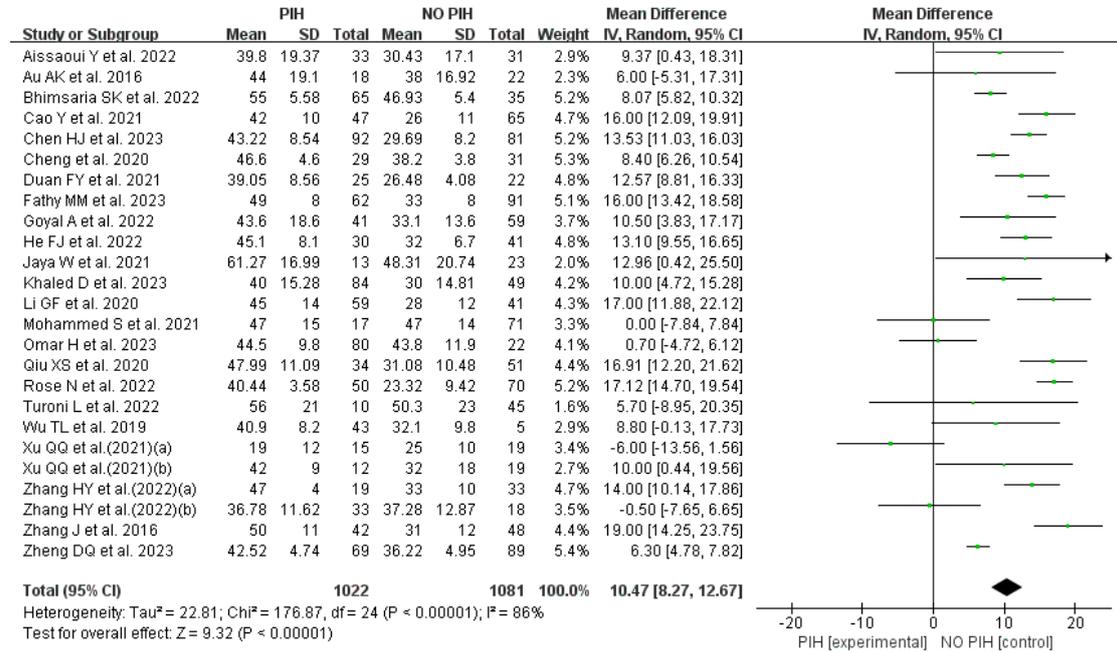

Figure S2B: Forest plot for the mean difference of DIVCmax between patients with PIH and without PIH.

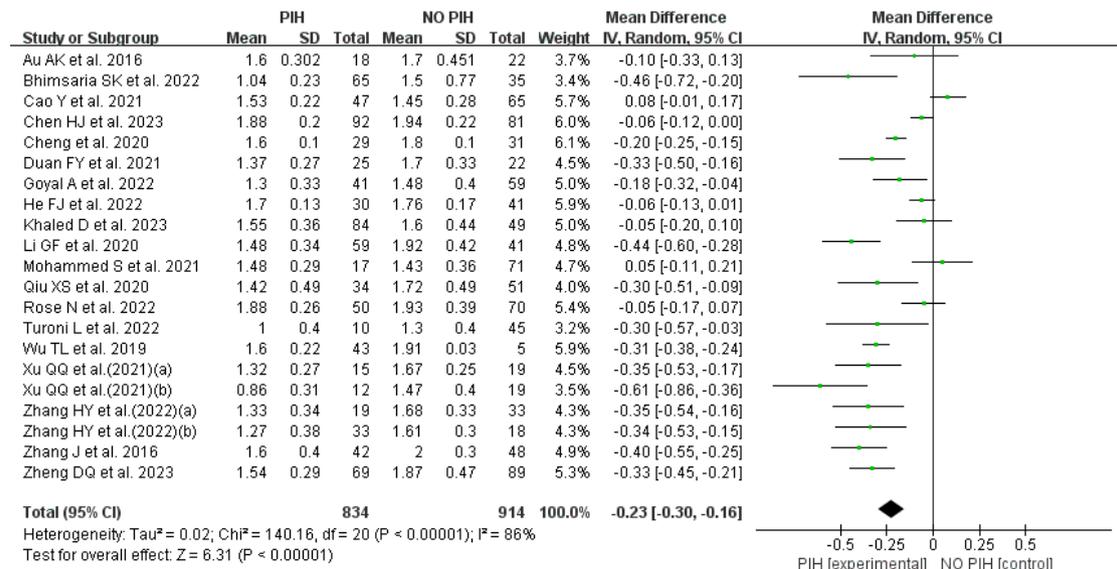

Figure S2C: Forest plot for the mean difference of DIVCmin between patients with PIH and without PIH.

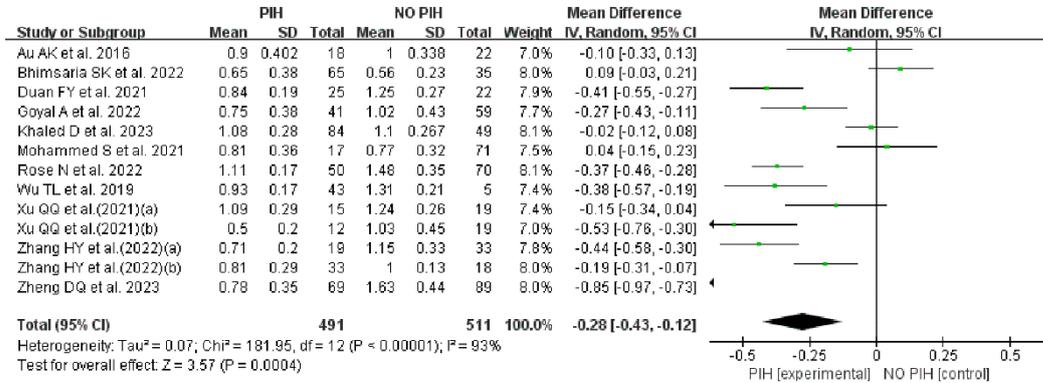

Figure S2D: Forest plot for the mean difference of carotid artery FTc between patients with PIH and without PIH.

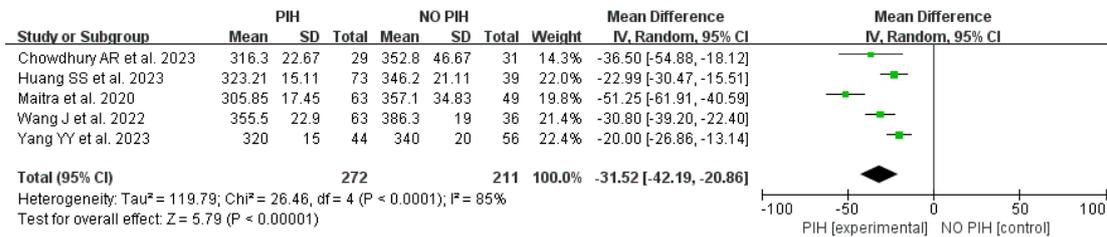

Figure S3A: Fagan's nomogram for IVC-CI.

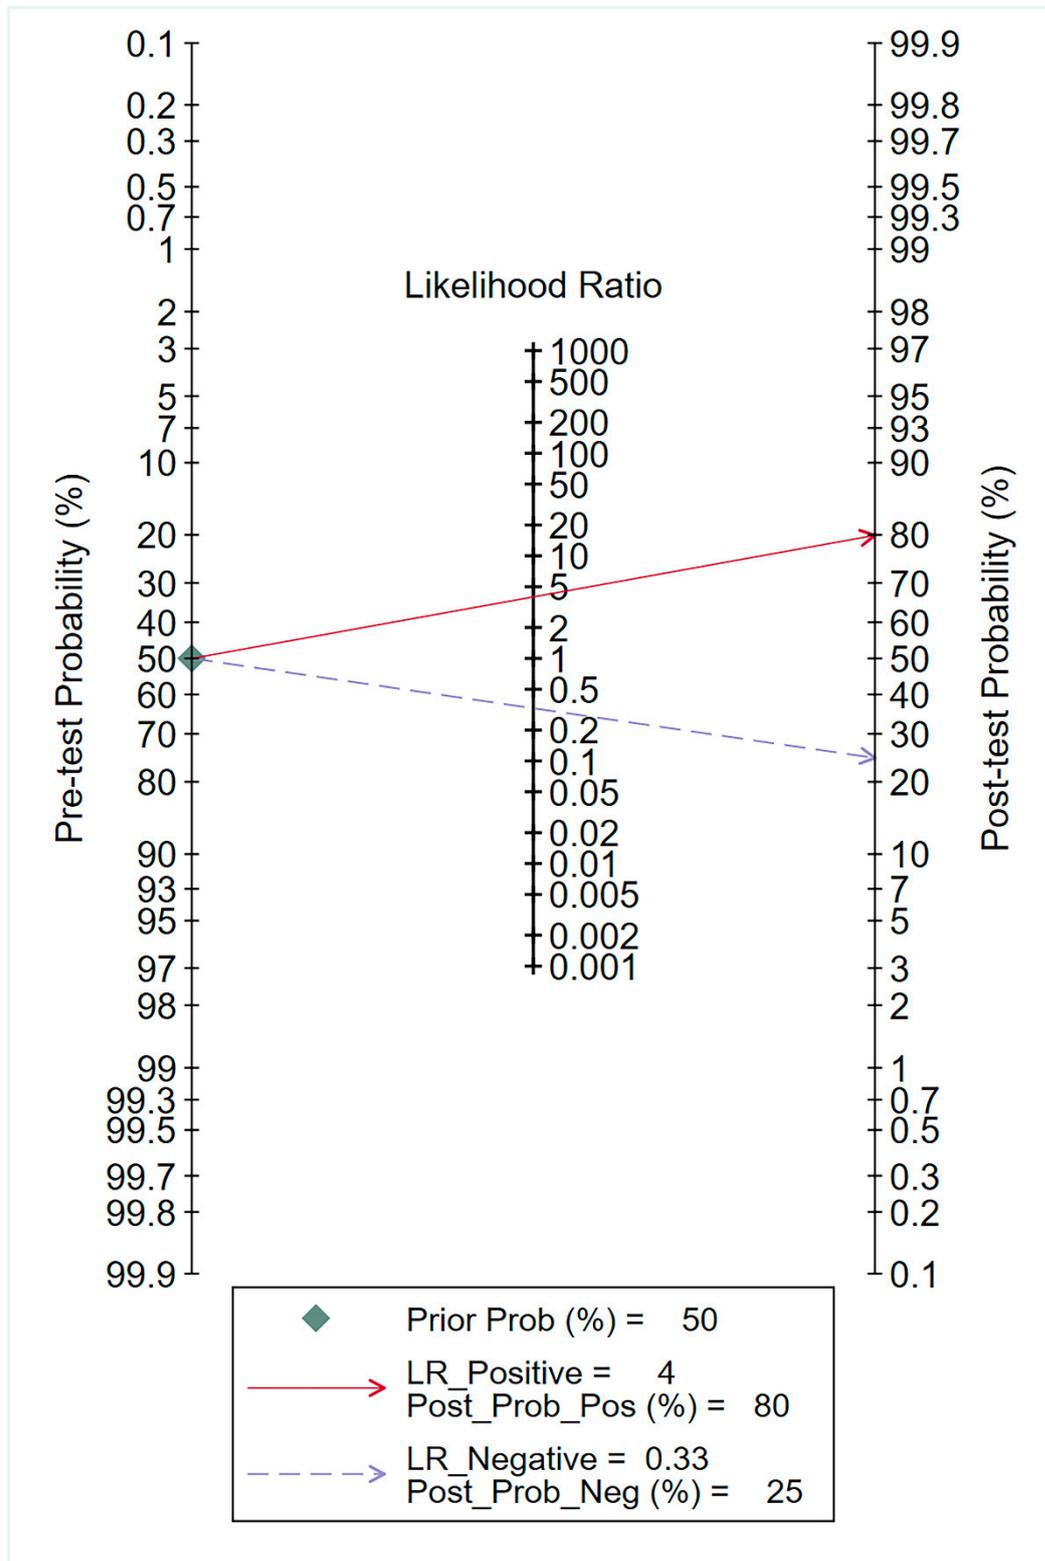

Figure S3B: Fagan's nomogram for DIVCmax.

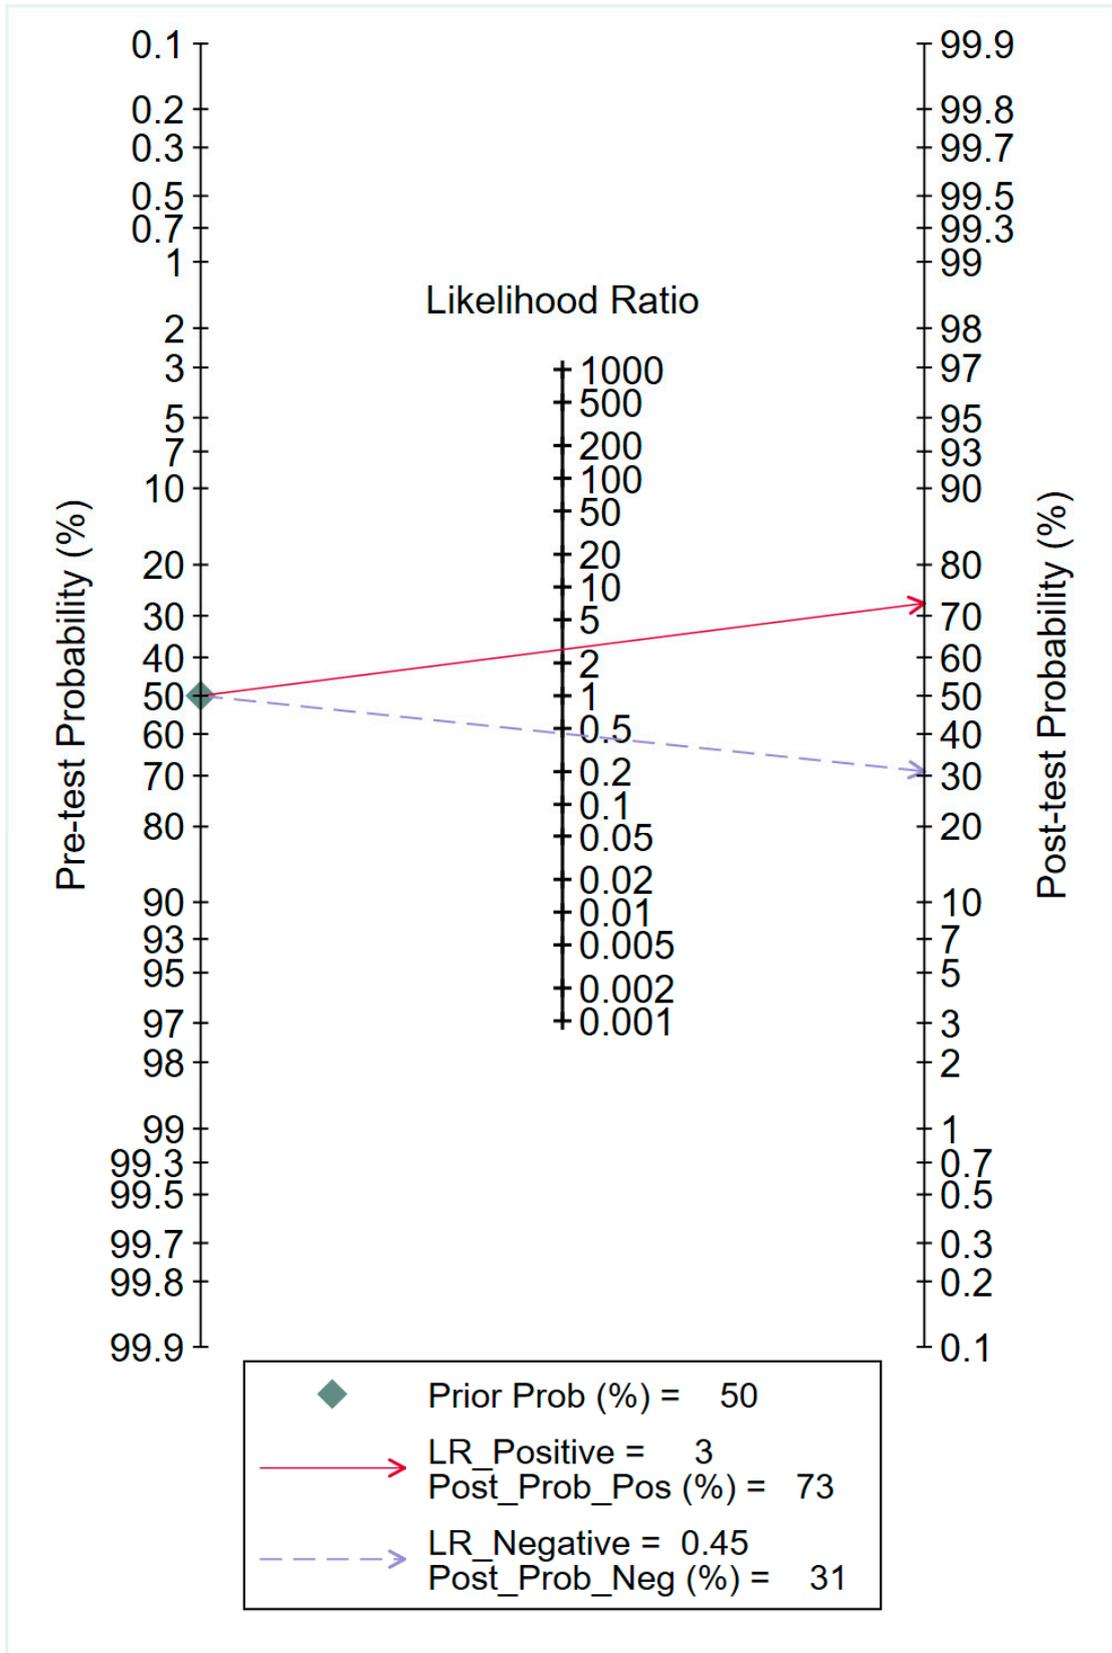

Figure S3C: Fagan's nomogram for DIVCmin.

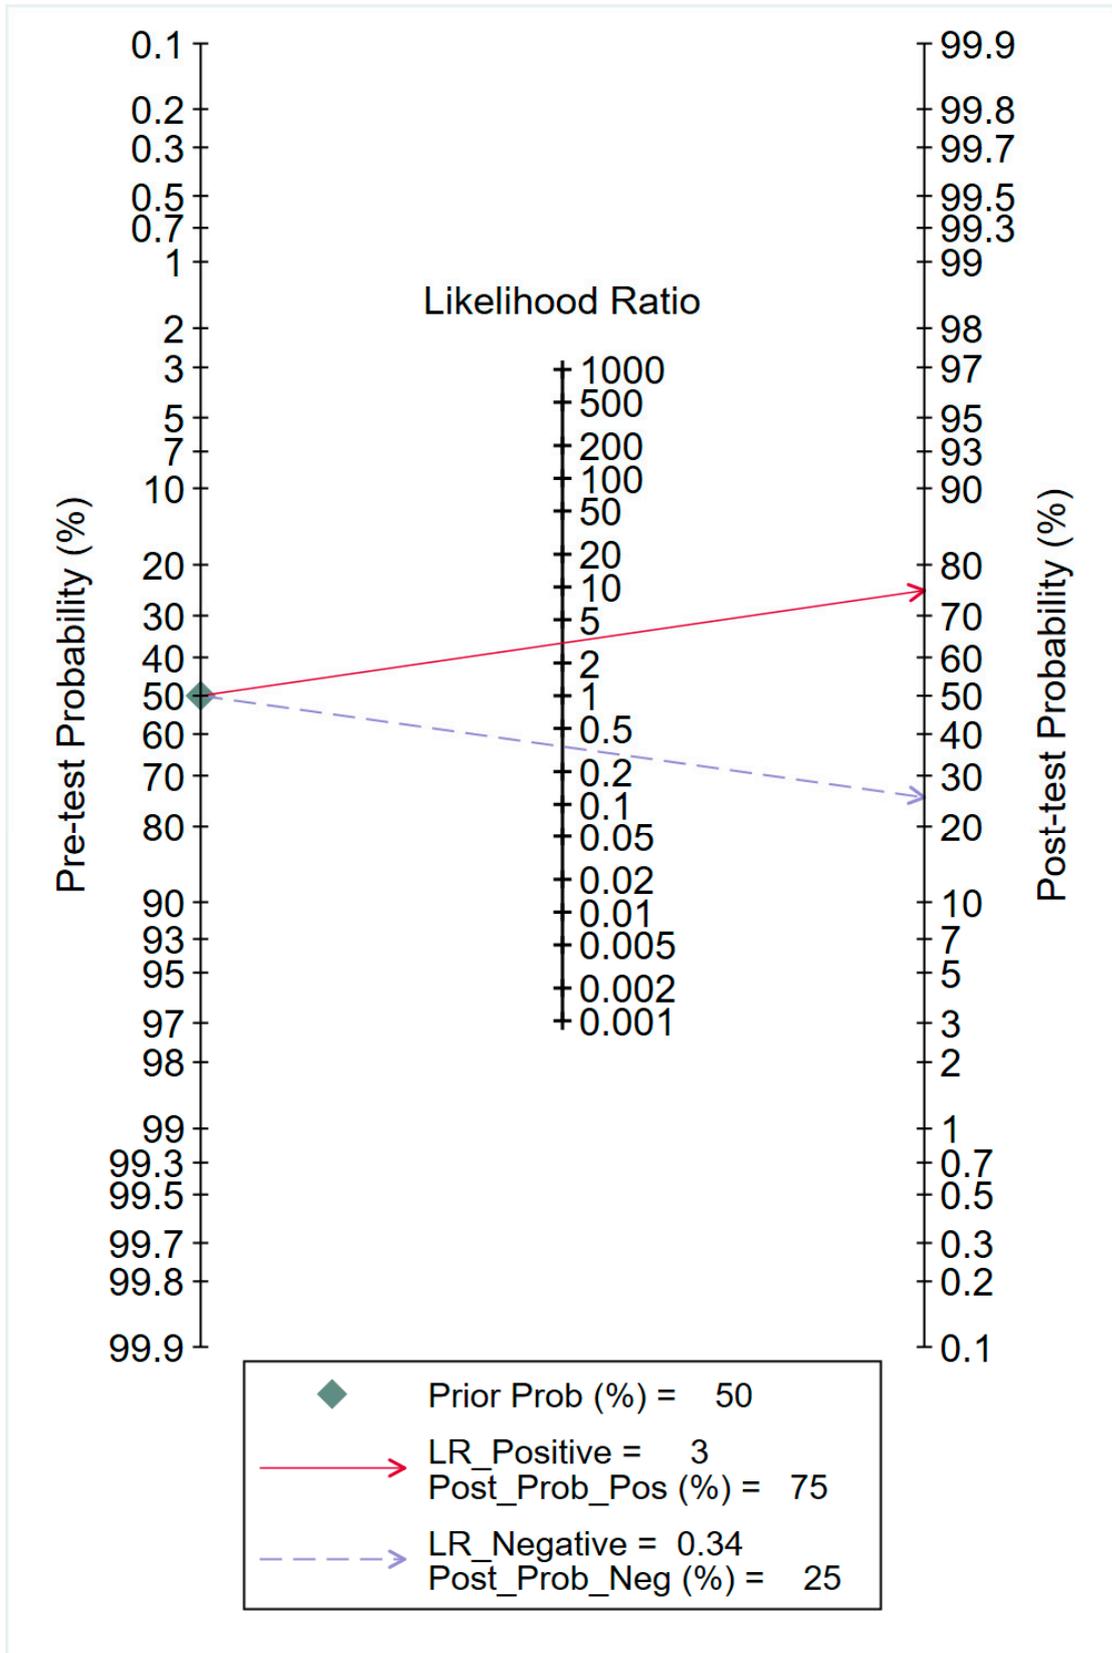

Figure S3D: Fagan's nomogram for carotid artery FTc.

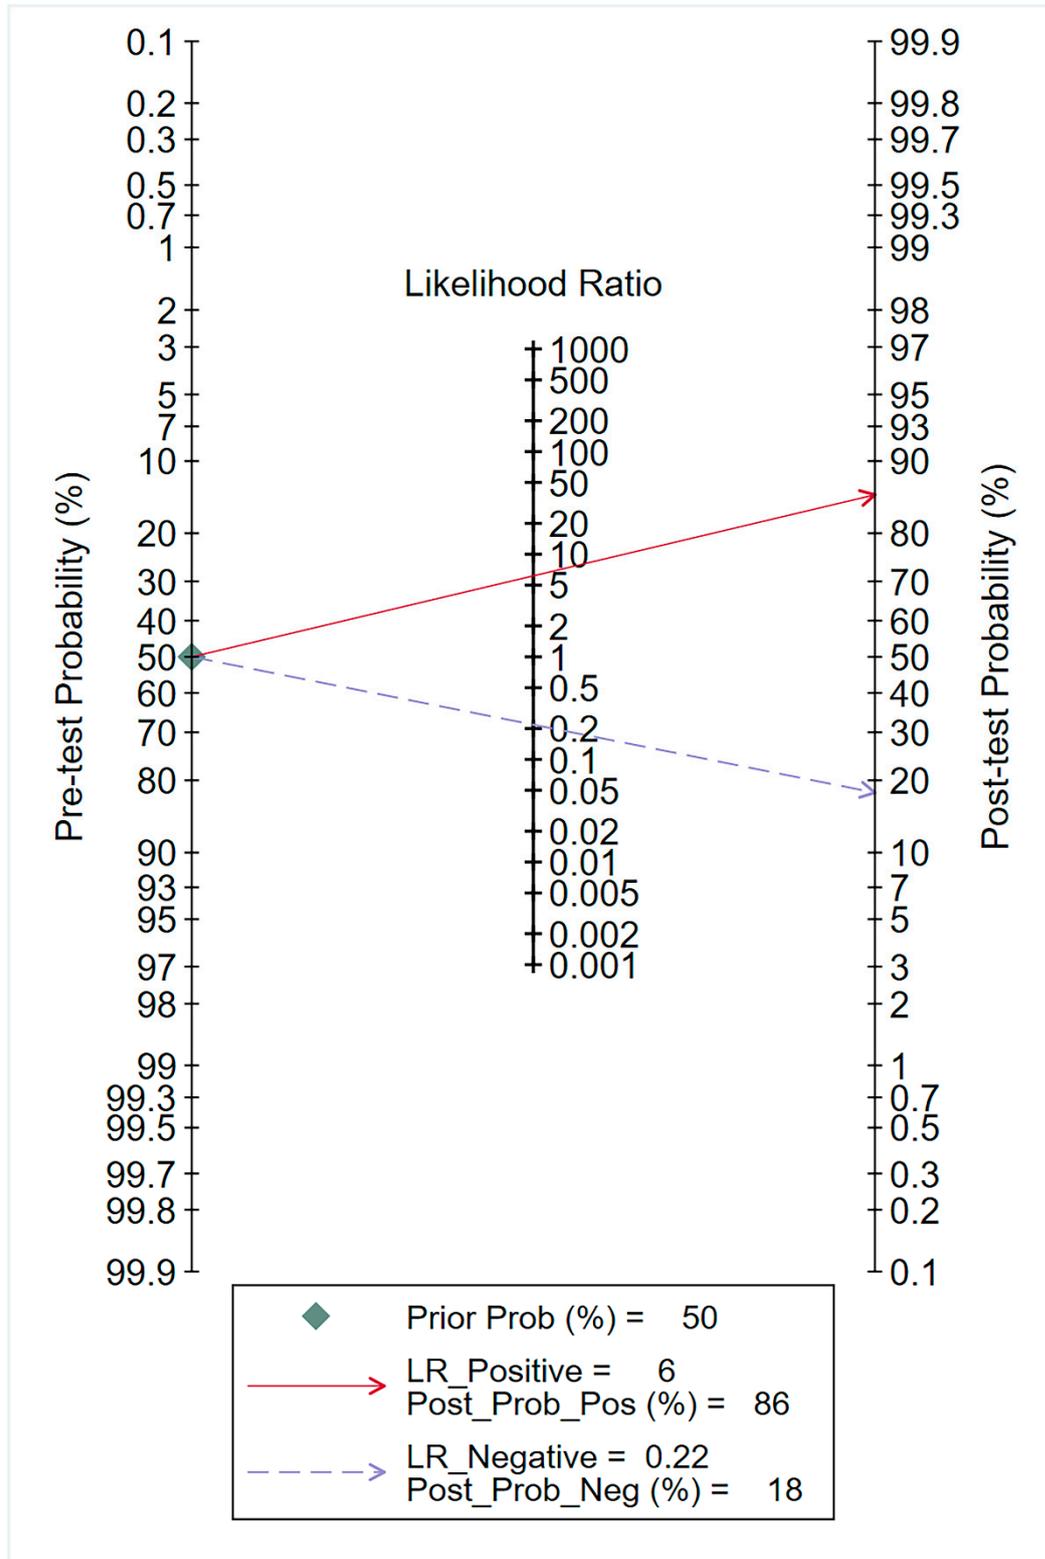

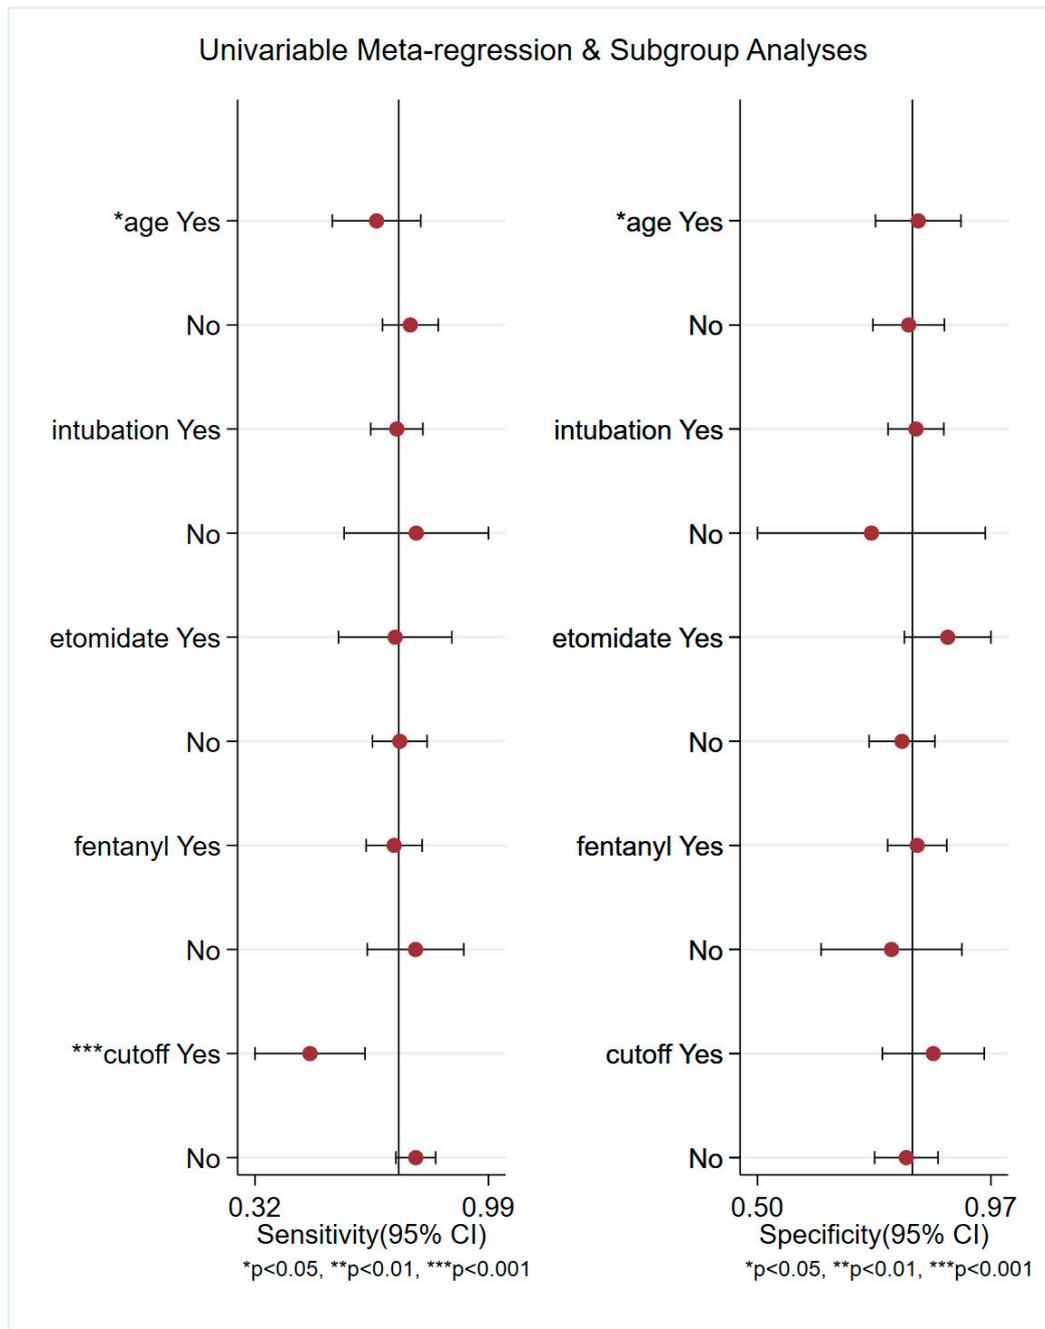

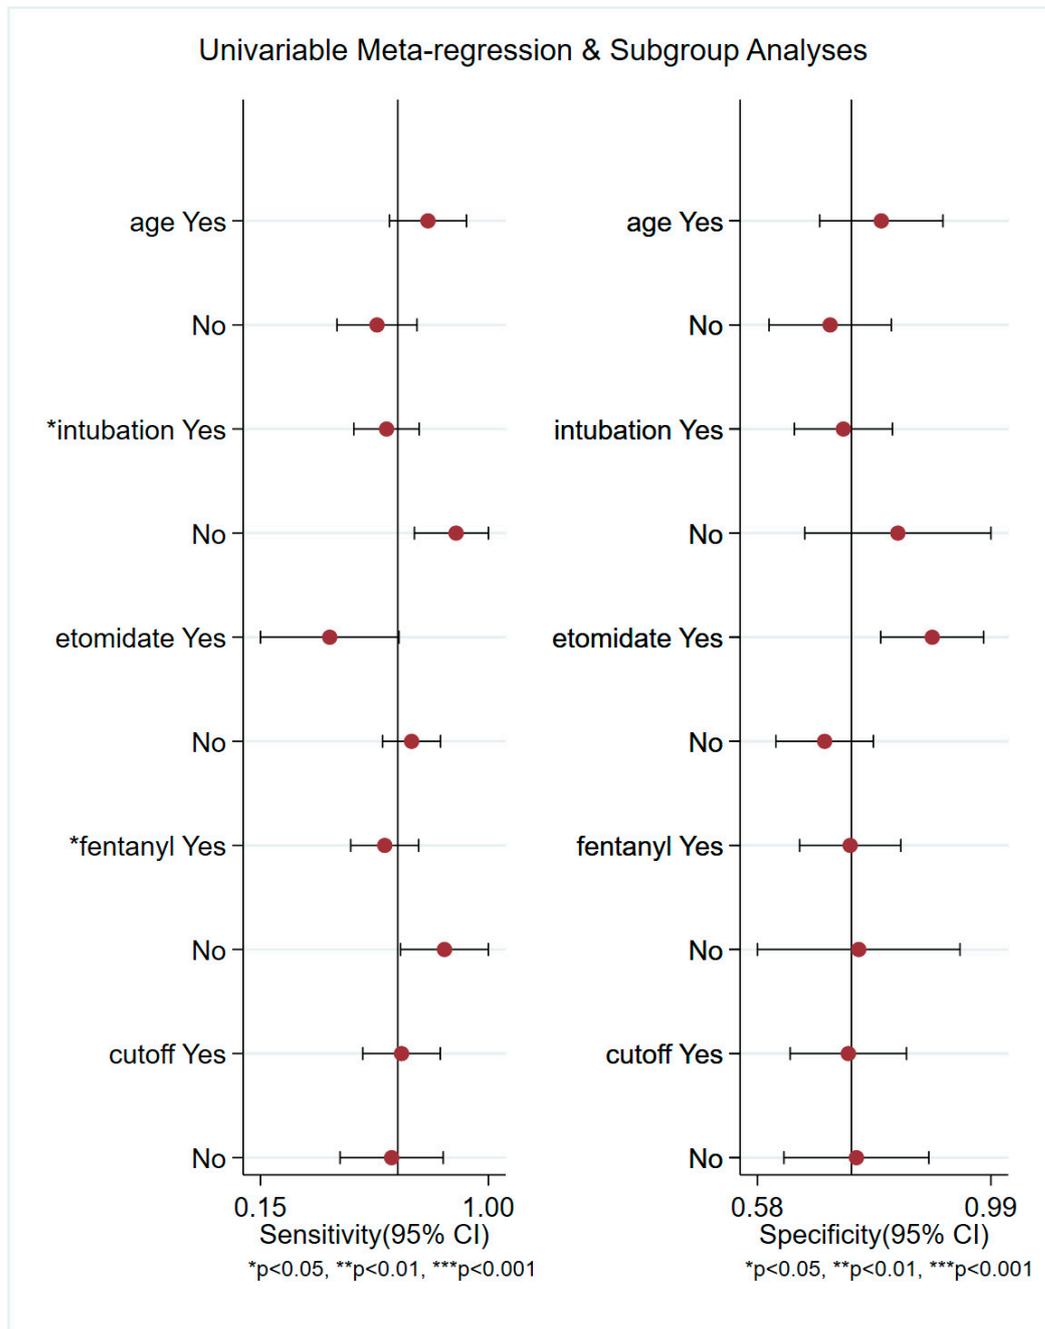

Figure S4A: Meta-regression for IVC-CI.

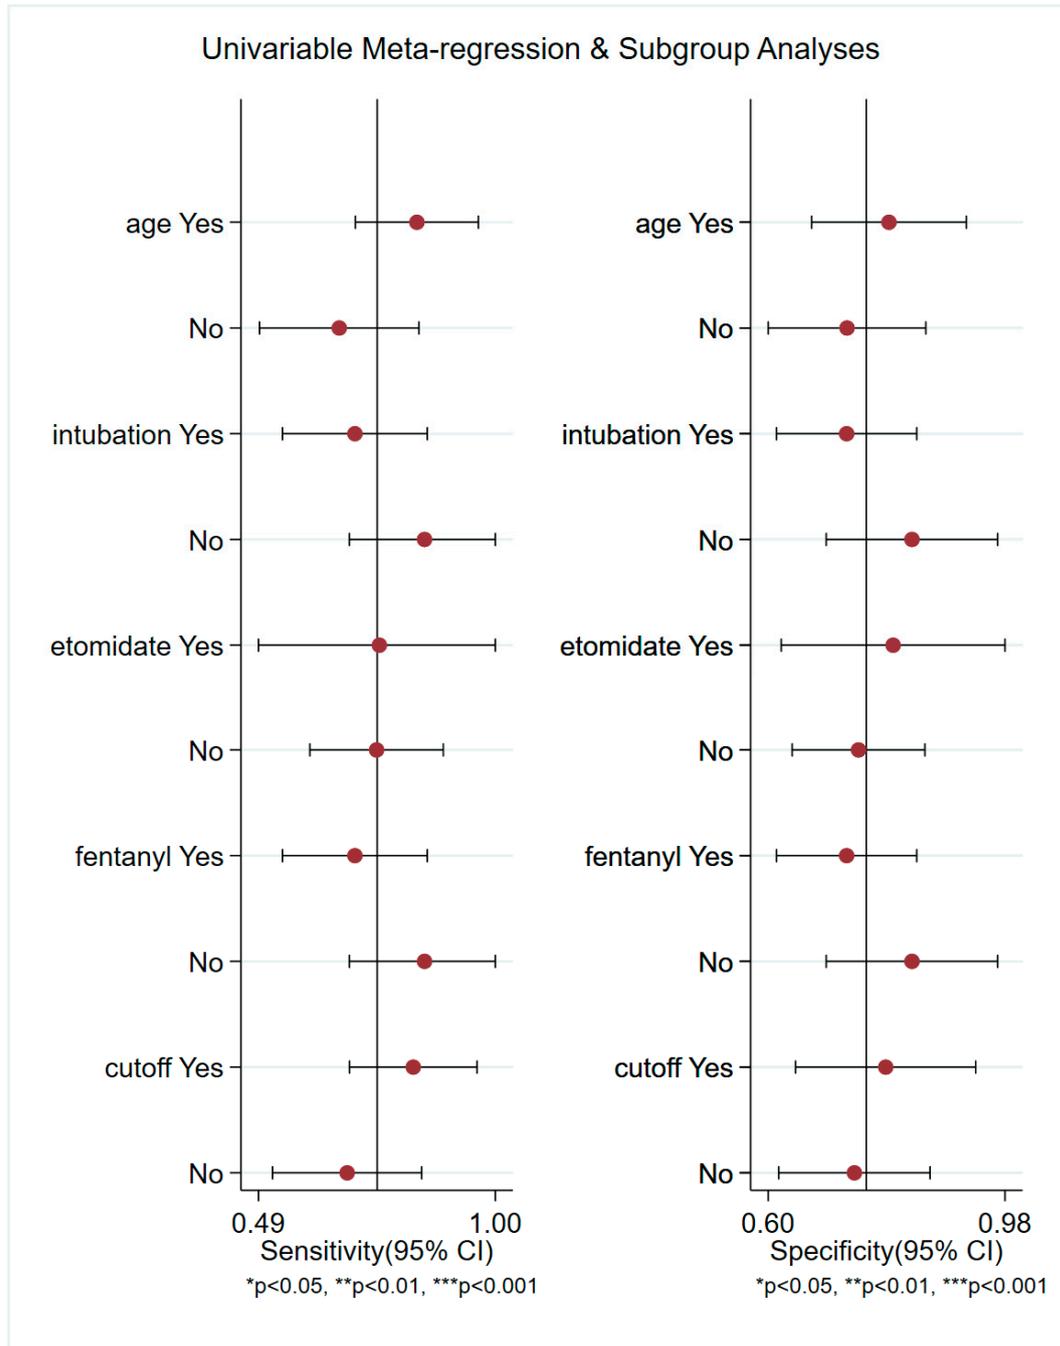

Notes: age: Yes = age > 60 years, No = other; etomidate: Yes = using etomidate for anesthesia induction, No = other; fentanyl: Yes = using fentanyl for anesthesia induction, No = other; cutoff: Yes = IVC-CI > 50%, No = other.

Figure S4B: Meta-regression for DIVCmax.

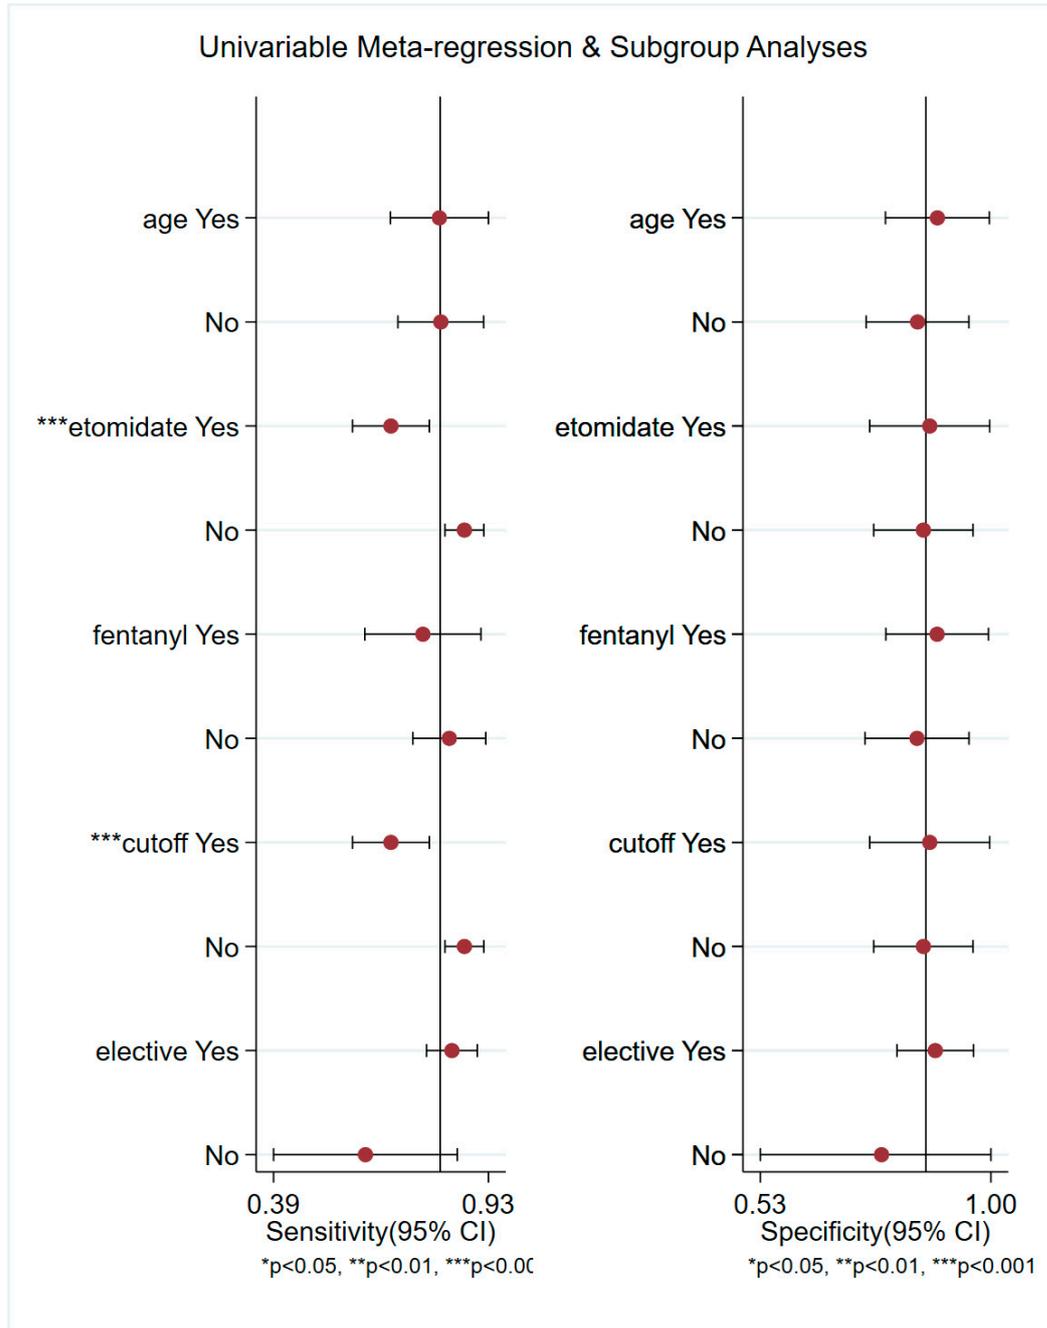

Notes: Yes = age > 60 years, No = other; etomidate: Yes = using etomidate for anesthesia induction, No = other; fentanyl: Yes = using fentanyl for anesthesia induction, No = other; cutoff: Yes = DIVCmax > 1.5cm, No = other.

Figure S4C: Meta-regression for DIVCmin.

Notes: Yes = age > 60 years, No = other; etomidate: Yes = using etomidate for anesthesia induction, No = other; fentanyl: Yes = using fentanyl for anesthesia induction, No = other; cutoff: Yes = DIVCmin>0.9cm, No = other.

Figure S4D: Meta-regression for carotid artery FTc.

Notes: Yes = age > 60 years, No = other; etomidate: Yes = using etomidate for anesthesia induction, No = other; fentanyl: Yes = using fentanyl for anesthesia induction, No = other; cutoff: Yes = carotid artery FTc > 340ms, No = other.

Figure S5A: Deeks' funnel plot asymmetry test for publication bias of IVC-CI.

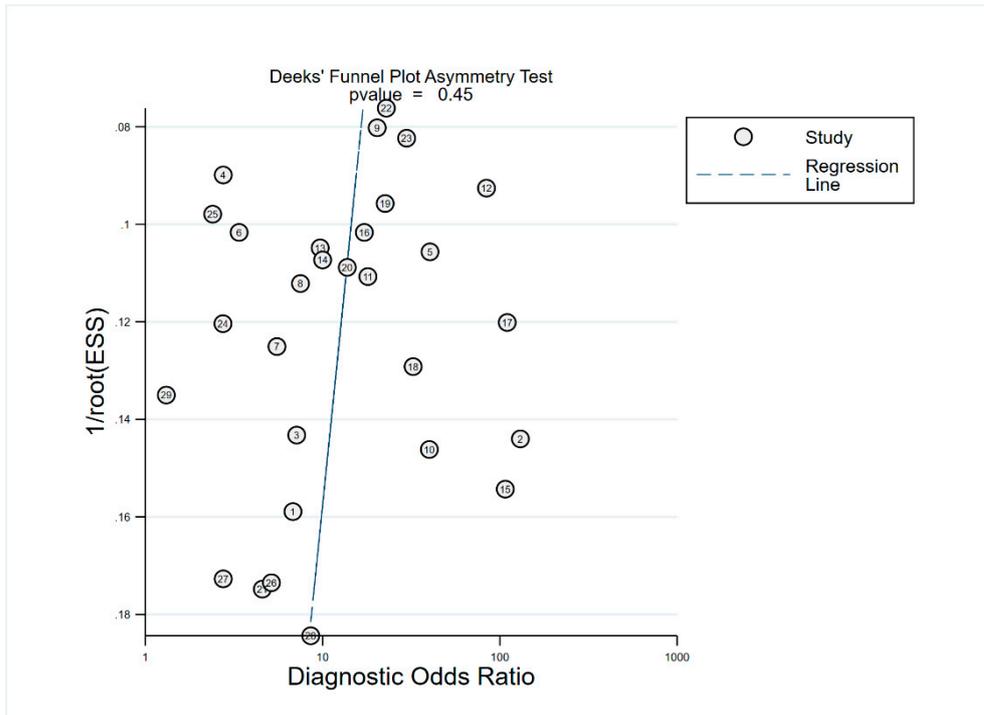

Figure S5B: Deeks' funnel plot asymmetry test for publication bias of DIVCmax.

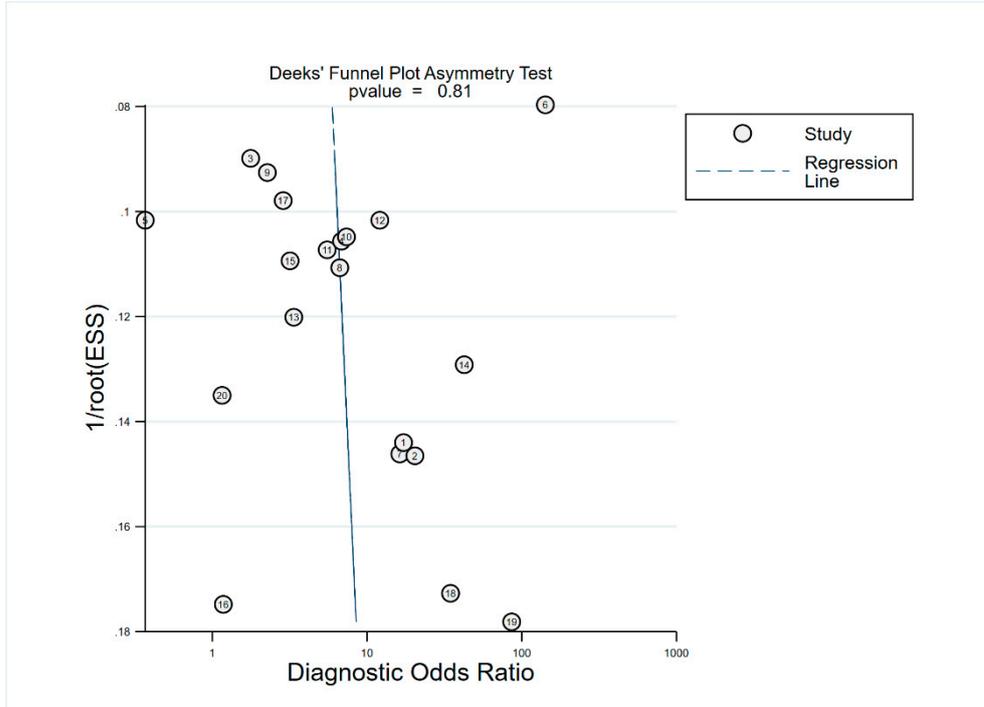

Figure S5C: Deeks' funnel plot asymmetry test for publication bias of DIVCmin.

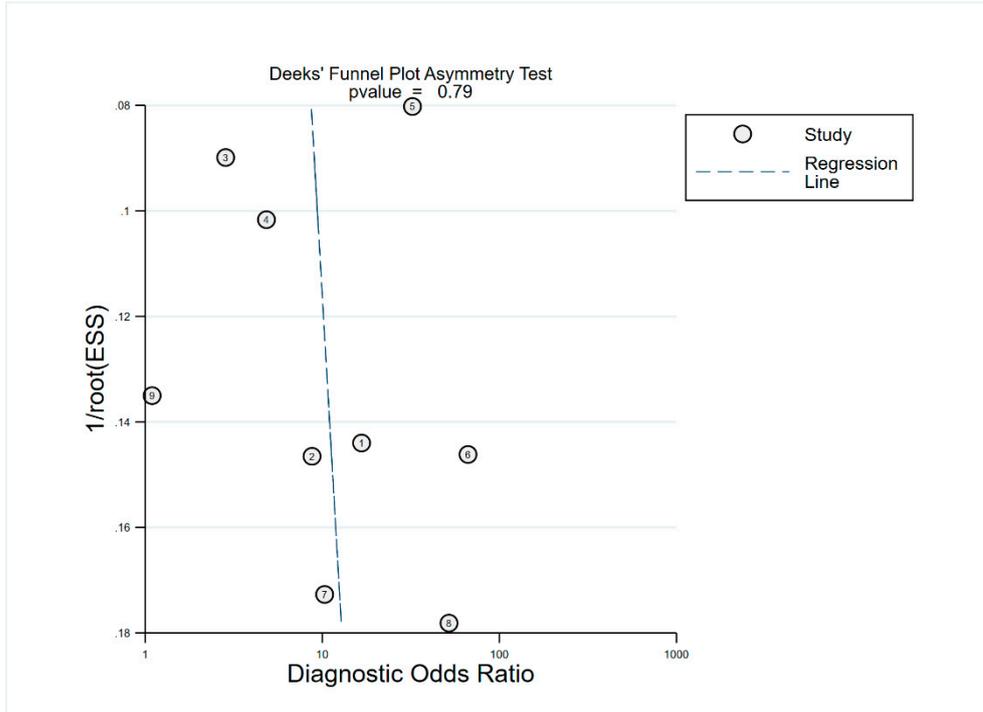

Figure S5D: Deeks' funnel plot asymmetry test for publication bias of carotid artery FTc.

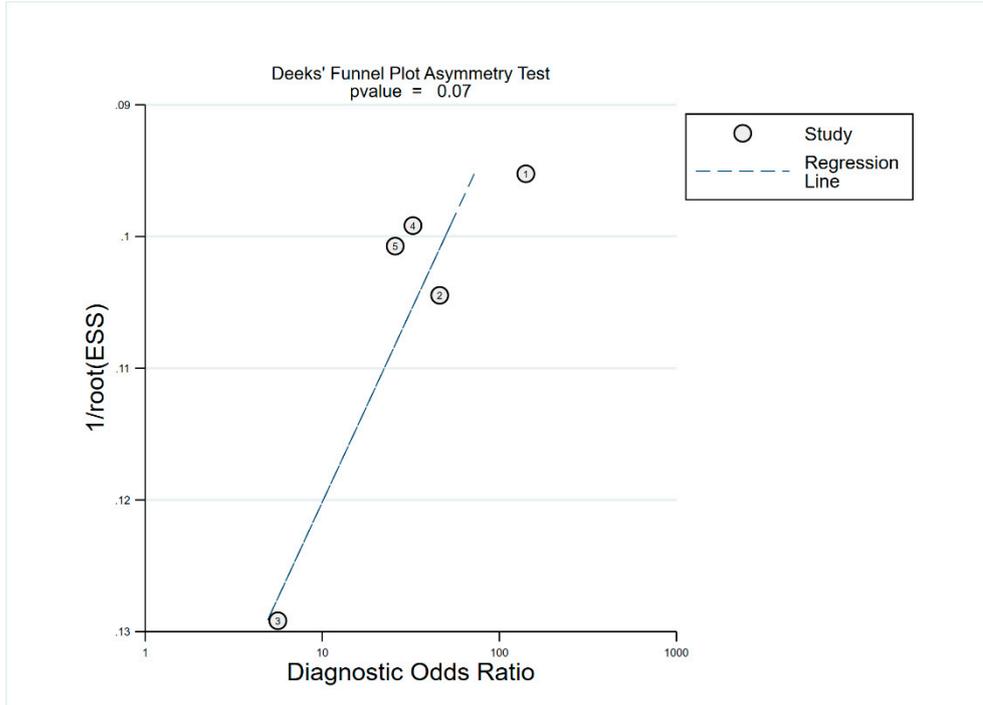

Figure S6: Assessment of Risk of Bias According to QUADAS-2.
