Message from the Guest Editors

Dear Colleagues,

Our modern society demands both materials and construction methods that are not only efficient and economical but also environmentally friendly. The research community has been presented with the challenge to find the most eco-efficient building materials possible. The aim this community is to develop materials with mechanical and durability properties equivalent to those of current materials but with a lower carbon footprint. Nowadays, there is a significant amount of research carried out on eco-efficient building materials. However, as this is an area of knowledge that is crucially relevant to the planet's environmental evolution, it is of the utmost importance that the most recent and relevant information is compiled in a Special Issue to increase the visibility of these publications.

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
