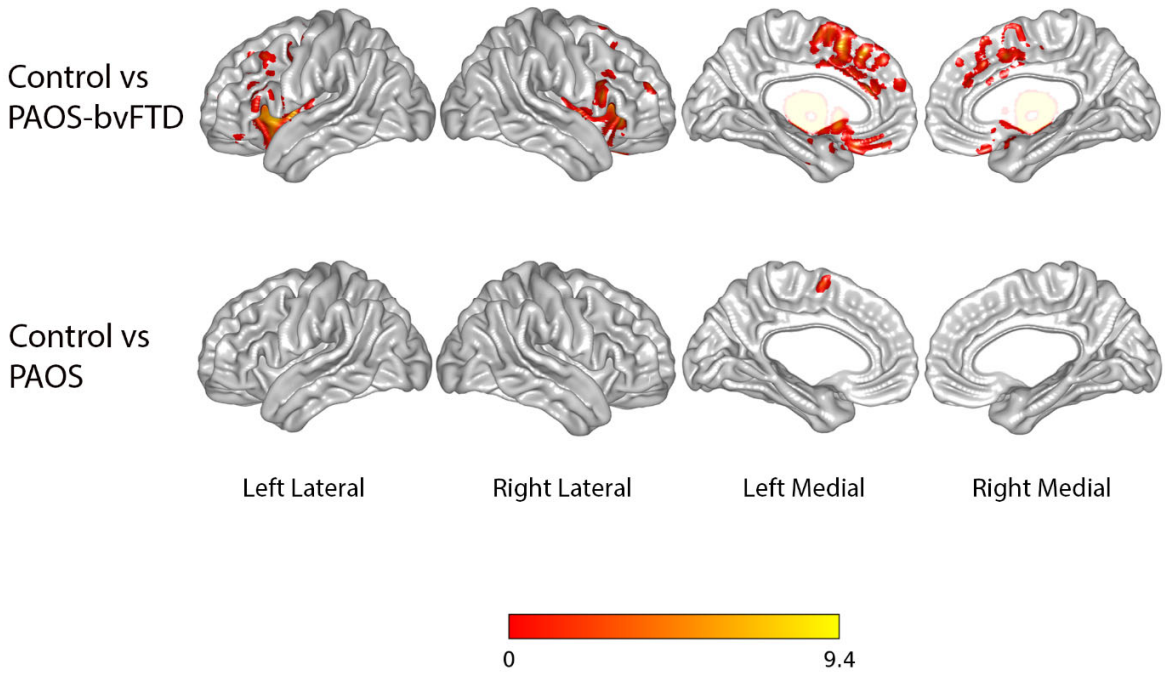
Supplementary Figure S1



Supplementary Figure S1

Figure S1: Brain renders showing regions of gray matter volume comparison between controls and PAOS-bvFTD (first row) and controls and PAOS (second row). Results show lateral and medial 3-dimensional renderings of the brain, with significant differences after family wise error correction at $p<0.05$. bvFTD= behavioral variant frontotemporal dementia; PAOS= primary progressive apraxia of speech.
