## Structures, Regulation, Signaling, and Physiological Functions of Adhesion G-Protein Coupled Receptors

Guest Editors:

**Prof. Dr. Ines Liebscher**

Rudolf-Schönheimer-Institute for  
Biochemistry, University Leipzig,  
04103 Leipzig, Germany

**Prof. Dr. Simone Prömel**

Institute of Cell Biology, Heinrich  
Heine University Düsseldorf,  
Düsseldorf, Germany

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Adhesion G protein-coupled receptors (aGPCRs) are unique and highly understudied receptors that play essential roles in health and disease. Thus, there is a growing interest in the identification of new physiological targets as well as elucidating the molecular mechanisms behind the known functional implications. With the majority of aGPCRs being orphan receptors, establishing new ligands and characterizing downstream effectors and modulators are of utmost importance. Further, structural information is invaluable.

Therefore, this Special Issue aims to gather novel work, advances, and opinions from scientists worldwide on aGPCR structures, physiology, signal transduction and regulation, activation mechanisms, identification of ligands and modulators, as well as clinical aspects. This Special Issue welcomes original research articles, clinical reports, and review articles. Articles will be peer reviewed and published in the open access journal *Cells*. We look forward to your contributions.

# Special Issue

*cells*

an Open Access Journal by MDPI

## Editors-in-Chief

**Prof. Dr. Alexander E.  
Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
