Deadline for manuscript
submissions:

closed (20 May 2024)

Message from the Guest Editors

Dear Colleagues,

Cardiovascular diseases remain the leading cause of mortality worldwide, necessitating the continuous exploration of innovative diagnostic techniques, treatment strategies and preventive measures.

In this Special Issue, renowned experts and researchers will contribute their insights on a range of topics, including the identification and management of risk factors, breakthroughs in non-invasive imaging techniques, personalized approaches to treatment and the integration of digital health technologies in cardiovascular practice. By addressing these challenges head-on and exploring potential future directions, this collection aims to foster a deeper understanding of the dynamic field of cardiology and angiology, ultimately leading to improved patient outcomes and enhanced cardiovascular care.

We are seeking original research, reviews, case studies, clinical trials and opinion pieces exploring challenges and prospects in clinical cardiology and angiology. Innovative diagnostics, treatments, translational research and healthcare delivery topics are welcome, contributing to advancements in cardiovascular and vascular care.
