Message from the Guest Editors

This Special Issue of *Microorganisms* invites researchers to contribute research articles, reviews, and opinions addressing the latest knowledge on the secondary metabolism of microorganisms, including molecular biology, omics, synthetic biology, industrial microbiology, genome editing, metabolite production, downstream processing, gene control and regulation, etc., both in fundamental research and its applications. This Special Issue is divided into three blocks: i) microbial secondary metabolites; ii) the regulation of secondary metabolism; and iii) communication between microbial communities. Manuscripts covering these areas of knowledge, and others related to microbial secondary metabolism, are of interest for this Special Issue.

Deadline for manuscript submissions:

31 July 2024

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
