Deadline for manuscript
submissions:

25 June 2024

Non-thermal technologies are widely used in the food technology area to reduce the adverse effects of temperature on the nutritional quality of processed foods.

In recent years, new thermal and non-thermal technologies have been developed to ensure safety and shelf life. In addition, the development of new ingredients with technological characteristics desired by the food industry has been based on the application of these technologies.

This Special Issue on “Applications of Non-Thermal Technologies and Thermal Technologies in Food Processing” seeks high-quality works focusing on the latest novel advances in non-thermal technology. Topics include, but are not limited to:

- Improvement in the bioaccessibility of bioactive compounds;
- Food waste valorization;
- Starch, protein and fibre modification;
- Flavour modulation.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
