Message from the Guest Editors

Contributions to this Special Issue are expected to push the boundaries of user interaction within the ambient environment, exploring how sensor technologies can facilitate the design of cross-device interaction and the ways they can improve the usability of meta-user interfaces to gradually engage users in the surrounding space.

Topics of interest include (but are not limited to) the following:

- Predictive interaction
- Interaction in IOT
- Cross-device interaction
- Ubiquitous interaction
- Mixed reality in the ambient environment
- Adaptive and Context-Aware Interfaces
- Full-body interaction
- Multitouch interaction
- Haptic Feedback
- Gestural interaction
- User engagement

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
