

## Research Advances in Sustainable Materials and Structural Engineering

Guest Editors:

**Dr. Moussa Leblouba**

**Dr. Balaji PS**

**Dr. Muhammad Rahman**

**Dr. Brabha Nagaratnam**

**Dr. Keerthan Poologanathan**

Deadline for manuscript  
submissions:

**31 January 2025**

### Message from the Guest Editors

With the growing concern about environmental issues and the energy crisis, sustainable development in the construction industry has become a global concern. The concept of sustainable building and development covers the entire life cycle of the buildings. It is intended to minimize all adverse impacts on the natural and built environments through environmentally friendly building designs and materials. Accordingly, research on developing sustainable materials and design methods is essential.

This Special Issue aims to disseminate research on sustainable materials and structural engineering that directly benefit the built environment and efficiently exploit natural resources.

Research topics may include, but are not limited to:

Efficient use of building materials

Composite materials and their contribution to reducing environmental impact

Energy-efficient buildings

Structural engineering for improved sustainability.

Structural retrofitting and rehabilitation for durable and sustainable infrastructure

New building materials and construction processes

Life cycle analysis of sustainable technologies

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
