Starch condition
Statistics of Pathway Enrichment
Protein processing in endoplasmic reticulum
Arachidonic acid metabolism
Sulfur relay system
Ether lipid metabolism
Ubiquinone and other terpenoid-quinone biosynthesis
Glycosylphosphatidylinositol (GPI)-anchor biosynthesis
Base excision repair
Pentose phosphate pathway
Glutathione metabolism
Steroid biosynthesis
RNA degradation
Glycerolipid metabolism
Pentose and glucuronate interconversions
Glycerophospholipid metabolism
Endocytosis
Spliceosome
Carbon metabolism

Cellulose condition
Statistics of Pathway Enrichment
Glycine, serine and threonine metabolism
Carbon metabolism
Glyoxylate and dicarboxylate metabolism
D-Arginine and D-ornithine metabolism
Peroxisome
Citrate cycle (TCA cycle)
Proteasome
2-Oxocarboxylic acid metabolism
Arachidonic acid metabolism
Arginine and proline metabolism
Selenocompound metabolism
Lysine biosynthesis
Biosynthesis of amino acids
Aflatoxin biosynthesis
Protein export
Phenylalanine, tyrosine and tryptophan biosynthesis
Pentose phosphate pathway
Nitrogen metabolism
Histidine metabolism
Glutathione metabolism
