Table S4. Statistical analysis results for the antioxidant capacity of the Athinolia variety with respect to the irrigation regime (Grove 3: rainfed, Grove 4: irrigated), using Kruskal-Wallis for the DPPH•, ABTS•+, $O_2^{\bullet-}$, OH•, Reducing power, and ROO• assays.

	Adjusted P Value					
	DPPH•	**ABTS•+**	**$O_2^{\bullet-}$**	**OH•**	**Reducing Power**	**ROO•**
Grove 2 vs. Grove 3	0.9128	0.2043	0.0773	0.7323	0.3599	0.1544
