Acute PJI (Symptoms for < 4 weeks)
(early or late acute PJI)
Unknown pathogen
open lavage and standardized sampling
Resistent-based antibiotic treatment
Known pathogen
Resistent-based antibiotic treatment
Screening for secondary foci
DAIR and modular component exchange
Infection remediation
Infection persistance
1. Intermittent lavage (max. 2 times) under resistent-based antibiotic treatment
2. if further persistent, further procedures according to algorithm for chronic infections
