Supplementary Figure S3 Species rarefaction curves of endophytes isolated from each plant tissue (leaves, blue; twigs, green) collected from cv. Nocellara del Belice (NB), cv. Nocellara etnea (NE), cv. Nocellara messinese (NB) and wild olive accessions (SYLV). Curves were obtained using the individual rarefaction analysis in PAST 4.17 software, setting Simpson 1/D (Hill's number) as index.
