STUDY TITLE: Assessment of the knowledge, attitudes and practices of the population and the reasons for non-compliance with barrier measures in the management of COVID-19

IDENTITY OF RESEARCHERS AND PARTNER INSTITUTIONS This study will be conducted in collaboration with : Prof BONFOH Bassirou, Dr FOKOU Gilbert, Dr HEITZ-TOKPA Kathin - CSRS, Dr YAPI Brou Richard, Dr HOUNGBEDJI Abikpo Clarisse - CEMV-UAO, CSRS, Dr N'GUESSAN Gnagoran Kouakou Daniel - CEMV-UAO, DINDE Arlette Olaby, SANHOUN Aimé - UNA, CSRS, Dr AMIN Ariane - UFHB, CSRS, GBOKO Kossia Debia Therese (MD) - EISMV, CSRS.

OBJECTIVES OF THE STUDY

General objective

To know the factors of non-adherence of the population to the barrier measures and to determine the perception of the university community for an integrated management of the health crisis linked to COVID-19.

More specifically, it will aim to:

1. Identify the current knowledge of the target populations regarding the national measures against COVID-19;
2. Describe the attitudes and practices of the populations based on the observations of the respondents in relation to the measures enacted;
3. Identify the limiting, favourable and incentive factors for the adoption of barrier measures by the population;
4. Identify the impacts of these measures on the material, relational and subjective well-being of the population.

RESEARCH PROCEDURE

KAPB survey by questionnaire:

The aim of this study is to know and understand the practices and behaviours related to COVID-19. We have developed a questionnaire and we would like to ask you to participate. Specifically, we will ask you some questions. The main topics will be: practices and behaviours related to the measures issued by the authorities in relation to COVID-19 and their impact on your well-being.

The aim of respecting these measures is to avoid being infected and to limit the spread of COVID. Thus, having your opinions on the subject will allow us to make proposals to the decision-makers and strengthen the fight against this pandemic. It should not take more than 20-30 minutes to answer our questions.

Risks and benefits: There is no risk to you from this survey other than our intrusion into your daily activity.

Confidentiality: All information collected during this survey will be confidential. Only study members will have access to the data. We may publish key findings from this study, but your names and personal identities will not be revealed.

Consent: Participation in this study is entirely voluntary. There is absolutely no obligation to participate in this study.

Alternative participation: If you decide not to participate, this will not affect your relationship with any member of the study team in any way. Consequences if you decide to withdraw from the study and due process at the end of participation: You may decide to withdraw from this study at any time. However, we would like to make you aware that the data collected before your withdrawal may be used for reports and publications.

ETHICAL CONSIDERATION

THIS STUDY HAS RECEIVED APPROVAL FROM THE NATIONAL ETHICS COMMITTEE FOR LIFE SCIENCES AND HEALTH OF THE MINISTRY OF HEALTH AND PUBLIC HYGIENE UNDER THE REFERENCE NUMBER: N/Ref: 049-20/MSHP/CNESVS-kp
