GLASS LAI (1981-2018)
ERA5 variables and Jena CO_2
Modis IGBP
Double logistic function
Chilling accumulation (CA),
Atmospheric CO_2 concentrations (CO_2)
Growing degree-day (GDD)
Solar radiation (RD)
Soil moisture (SM)
Vapor pressure deficit (VPD)
Deciduous needleleaf forests (DNF)
Deciduous broadleaf forests (DBF)
Mixed forests (MIF)
Shrublands (SHL)
Woody savannas (WSN)
Savannas (SVN)
Grasslands (GRL)
Rate of vegetation green-up (RVG)
Multivariable regression considering interactions between variables (MRCI)
RVG trends over the northern extratropics and different biomes
The relative importance of interactive effects (RI_{IAE})
The key driving factors of RVG trends and factors attribution
