Special Issue

Sewage Sludge: Latest Advances and Prospects

Message from the Guest Editors

This Special Issue aims to collect up-to-date papers that explore the latest advances and prospects about sewage sludge. Both research papers and review articles are welcome. Short communications of preliminary but significant results and case studies will also be considered. Authors are invited to submit original research and review articles focusing on this area. **Potential topics** include but are not limited to the following: chemical-physical and microbiological characterization; treatments and valorization; advanced processes; minimization; options for reuse; technical and application solutions; contaminants of emerging concern; modelling. **Keywords:**

- sewage sludge
- biosolids
- water treatment
- reuse
- minimization
- technical solutions
- advanced processes

Guest Editors

Dr. Marco Carnevale Miino

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
