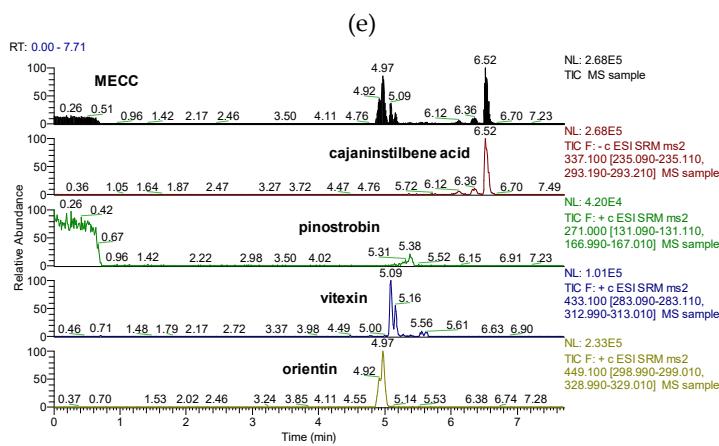

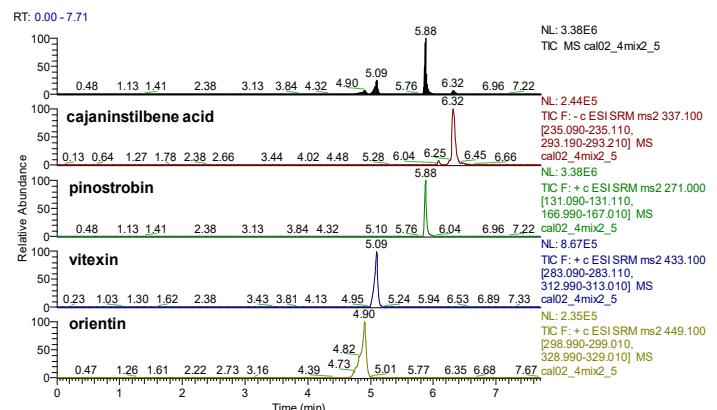

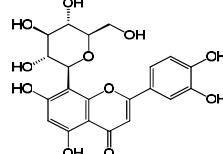

Figure S1. Chemical structure of (a) cajaninstilbene acid (b) pinostrobin (c) vitexin (d) orientin. (e) The multiple reaction monitoring (MRM) chromatograms of standard solution with 2.5 μ M of cajaninstilbene acid, pinostrobin, vitexin and orientin. (f) The MRM chromatograms of 10 μ L MECC sample (50 mg/mL).
