

Supplementary Material

Figure S1. S609A mutation does not affect the VWF binding function of GPIb-IX. **(a)** 1b9 or S609A cells were incubated with ristocetin in the presence or absence of VWF, and then were analyzed the VWF binding by flow cytometry. **(b)** The cells were also incubated with SZ2 to detect surface-expressed GPIb-IX levels. **(c)** Quantitative data from 3 different experiments are shown (mean \pm SD). VWF binding index equals total fluorescence/background fluorescence-1.
