Supplementary Materials: Bavachin from *Psoralea corylifolia* Improves Insulin-Dependent Glucose Uptake through Insulin Signaling and AMPK Activation in 3T3-L1 Adipocytes

Hyejin Lee, Hua Li, Minsoo Noh and Jae-Ha Ryu

**Figure S1.** Effect of extract and fractions of *Psoralea corylifolia* (PC) on adipocyte differentiation. 3T3-L1 cells were differentiated in the presence of test materials. At differentiation Day 8 (D8), cells were stained with Oil Red-O (ORO), and lipid accumulation was quantified as described in Materials and Methods section. Scale bar = 50 μm. Data are expressed as mean ± standard deviation (SD). 0, MDI alone; Rosi., rosiglitazone (1 µM); PC-Me, methanol extract; PC-He, hexane fraction; PC-EA, ethyl acetate fraction (0.5 µg/mL each). *p < 0.01 vs. MDI.
