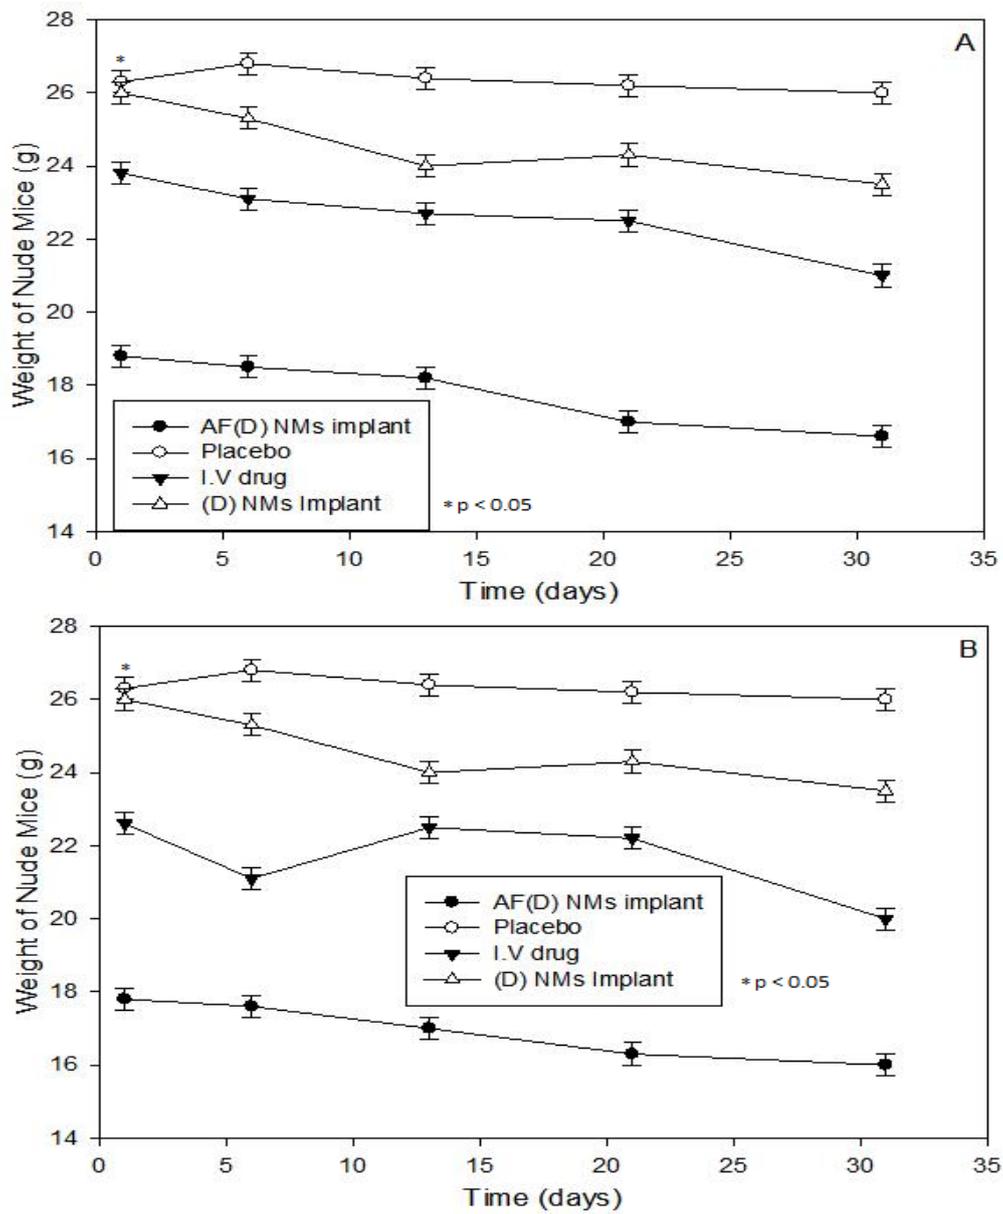

**Figure S1.** DSC thermograms of pure MTX (black graph), blank micelle nanoformulation (blue graph), MTX-loaded micelle formulation (red graph) demonstrating temperature variations and shifts in the curves.

**Figure S2:** <sup>1</sup>H NMR spectra of CHT-PVP-PNIPAAm hydrogel in D<sub>2</sub>O and crest peak assignment affirmative to the synthesized composite C-P-N structure.

**Figure S3:** Vibrational-Spectroscopy-FTIR of Chitosan (a), PNIPAAm (b), PVP (c) and combinational CHT-PVP-PNIPAAm hydrogel (d).

**Figure S4.** Nude mice average body weight curves illustrating chemotherapeutic efficacy in the 3 treatments and control (placebo) group. A refers to the methotrexate- and B the cisplatin-loaded PNIPAAm-b-PASP nanomicelle implant delivery system in NIH:OVCAR-5 EOC-bearing nude mice. Each point depicts mean (n=10/group); bar,  $\pm$ SD. \*:  $p < 0.05$  by t-test.
