Experimental results from [1] were found to be unreliable. In particular, the authors have attempted to replicate the real-time PCR and Western blot experiments but were not able to obtain the same results. All of the authors have agreed to the retraction of the paper [1], which will thus be marked online as retracted. The *International Journal of Molecular Sciences* is a member of the Committee on Publication Ethics (COPE) and takes very seriously the responsibility to enforce strict ethical policies and standards.
