

Figure S1. (A) Western blot with the anti-*MnNanos2* polyclonal antibody in ovary and testis extracts; (B) Western blot with the pre-immune rabbit serum in ovary and testis extracts; (C) Western blot with the anti-*MnNanos2* antibody that had been pre-absorbed with the purified recombinant *MnNanos2* protein in ovary and testis extracts.

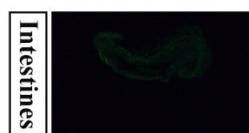

Figure S2. immunofluorescence localization of *MnNanos2* in the intestines.
