Supplementary figure

Figure S1

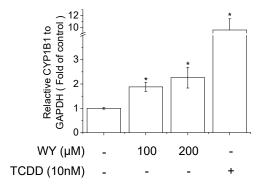

Figure S1. Effect of WY-14643 on CYP1B1 mRNA levels in MDA-MB-231 cells. Cells were treated with WY-14643 (100 and 200 μ M) or TCDD (10 nM) for 24 h, then lysed; total RNA was prepared for PCR analysis of CYP1B1 mRNA levels, relative to the level of GAPDH. Bars are means ± standard deviations of three independent experiments performed in triplicate. *p < 0.01, significantly different from the control.

Figure S2

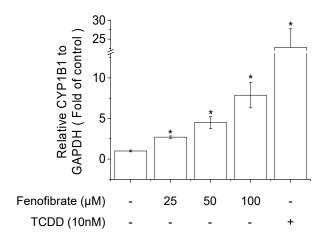

Figure S2. Effect of fenofibrate on CYP1B1 mRNA levels in MCF-7 cells. Cells were treated with fenofibrate (25, 50, and 100 μ M) or TCDD (10 nM) for 24 h, then lysed; total RNA was prepared for PCR analysis of CYP1B1 mRNA levels, relative to the level of GAPDH. Bars are means ± standard deviations of three independent experiments performed in triplicate. *p < 0.01, significantly different from the control.
