

Figure S1. Confirmation of ERVPb1 upstream sequence by RT-PCR. The upper figure shows the positional relationship between the ERVPb1 ORF and the three primer sets. Primer sets 1-3 contain 28, 551 and 1487bp upstream of ERVPb1 ORF, respectively. The lower figure indicates the results of RT-PCR. The RT-PCR primer used were UTR-F1: AAAGTGCAGTCTGAACTGCCGAGAA, UTR-F2: AGAAAACACTGACTCAGACAACAGG, UTR-F3: CCAGTTATATACCTGGGTCGAATTAATGTCCA and ORF-R: GGGGACCCAATCTTGACGTTGAGTG.
