

Supporting information

Supplementary Figure S1. Emission spectrum of ZnMP as a function of pH. The emission spectrum was obtained after excitation at 405 nm of a 10 μ M solution of ZnMP at different pH.

Supplementary Table S1. Oligonucleotides used.

Primer sequence	Application
TCTTGGTGACGCCGCAGTA	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. major</i>
GCCATCCACACGCCAGTC	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. major</i>
TTTGGTGCTGCCGATTGTG	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. major</i>
CACTGCGGACACGATAAGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. major</i>
GCGGTGACGAGATGTTGACG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. major</i>
GATTCCAGAACGCGTGGCAG	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. major</i>
TGAACCGAGTTGGAGCGGAAG	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. donovani</i>
CAACAGAATCACGACGACGAAG	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. donovani</i>
TTTGGTGCTGCCGATTGTG	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. donovani</i>
CACTGCGGACACGAGAAAGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. donovani</i>
GCGGTGACGAGATGTTGACG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. donovani</i>
GATTCCAGAACGCGTGGCAG	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. donovani</i>
TCTTCTTGCCTGCCTG	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. mexicana</i>
CGTCCTCTCGAGTGTGTCC	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. mexicana</i>
TTTGGTGCTGCCGATTGTG	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. mexicana</i>
CACTGCGGACACGATAAGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. mexicana</i>
GCGGTGACGAGATGATGACG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. mexicana</i>
TGTGACGCACGACGCACTCT	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. mexicana</i>
TGAACCGAGTTGGAGCGGAAG	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. infantum</i>
CAACAGAATCACGACGACGAAG	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. infantum</i>

Primer sequence	Application
TTGTGGTCTGCCGATTGTG	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. infantum</i>
CACTGCGGACACGAGAAGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. infantum</i>
GCGGTGACGAGATGTTGACG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. infantum</i>
GATTCCAGAACCGGGTGGCAG	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. infantum</i>
CTTCGCGGTTCTCTTAATCG	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. panamensis</i>
TTCGCTGTCCAGACTTGATG	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. panamensis</i>
TACAAGAGCGAGAGAGAGGCAG	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. panamensis</i>
ACAATAACGAAGCGAAACGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. panamensis</i>
GCGGGGATGAGATGATGACG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. panamensis</i>
GATTCCAGAACCGGGTGGCAG	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. panamensis</i>
GCATTCAGTATGCCAGTCC	Forward primer to amplify <i>LHR1</i> from cDNA in <i>L. tarentolae</i>
CGCCACTTCATTGCTGCC	Reverse primer to amplify <i>LHR1</i> from cDNA in <i>L. tarentolae</i>
CCTCATCAAGGTATCCAGAAC	Forward primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. tarentolae</i>
CATCGCAGCCAGAACAAATGG	Reverse primer to amplify <i>LFLVCRB</i> from cDNA in <i>L. tarentolae</i>
AGGCATCACCGGCATGAGCG	Forward primer to amplify <i>04.0930</i> from cDNA in <i>L. tarentolae</i>
CACGACGCACTCCCGATGT	Reverse primer to amplify <i>04.0930</i> from cDNA in <i>L. tarentolae</i>

Supplementary Table S2. Accession number of the genes used.

	<i>LHR1</i>	<i>LFLVCRB</i>	Hypothetical protein
<i>L. major</i>	LmjF.24.2230	LmjF.17.1430	LmjF.04.0930
<i>L. donovani</i>	LdBPK_242320.1	LdBPK_171550.1	LdBPK_040930.1
<i>L. infantum</i>	LINF_240028500	LINF_170021800	LINF_040014300
<i>L. mexicana</i>	Lmx.24.2230	LmxM.17.1430	LmxM.04.0930
<i>L. tarentolae</i>	LtaP24.2390	LtaP17.1570	LtaP04.0900
