

R2 vs. R4

W2 vs. W4

Figure S8. KEGG enrichment analysis P-value histogram. A histogram is plotted to show the degrees of DEM and DEG pathway enrichment based on the enrichment analyses. The abscissa represents the metabolic pathway. Red in the ordinate represents the enriched P-value of the DEGs. Green represents the enriched p-value of the DEMs and is expressed as $-\log P$. The degree of enrichment increases with ordinate height.
