

Supplementary Materials: Chemical Source Localization Fusing Concentration Information in the Presence of Chemical Background Noise

Víctor Pomareda, Rudys Magrans, Juan M. Jiménez-Soto, Dani Martínez, Marcel Tresánchez, Javier Burgués, Jordi Palacín and Santiago Marco

Figure S1. Picture of the exploration arena featuring the three extraction fans.

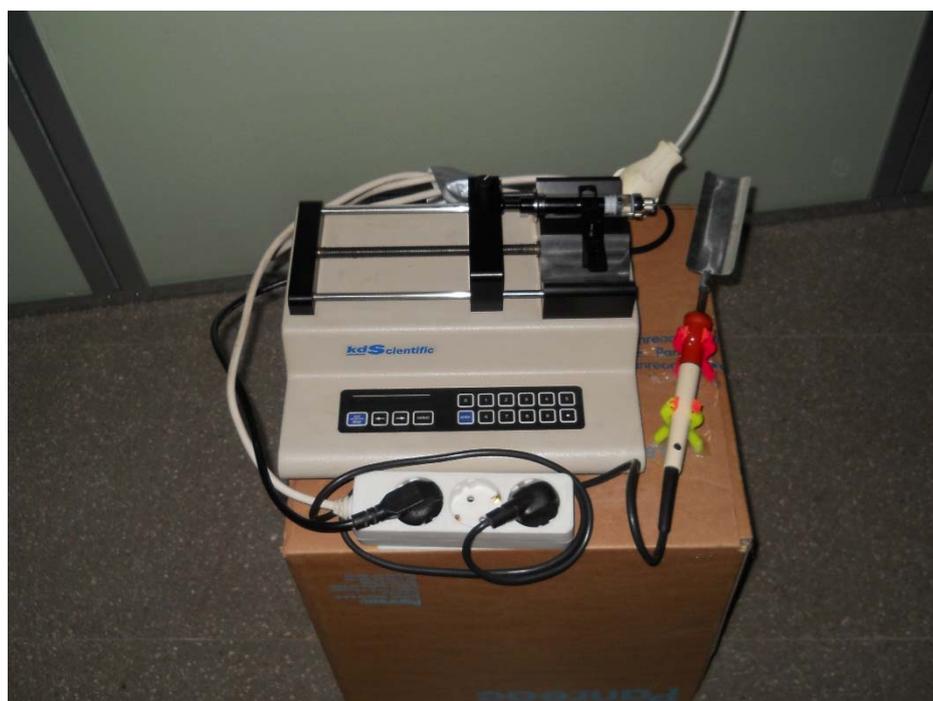

Figure S2. Chemical delivery system based on a KDS-200 injection pump. Drops fall in a hot plate for immediate vaporization.

Figure S3. Autonomous robot featuring the wind sensor and the photoionization detector.
