

Brain Age Prediction: A Comparison Between Machine Learning Models Using Brain Morphometric Data

Supplementary Materials

Cortical regions

Subcortical regions

Supplementary Figure S1. Definition of the Desikan-Killiany atlas.

Supplementary Table S1. List of the anatomical regions of the Desikan-Killiany atlas

Cortical regions				
Label number	Label Name	Hemisphere	Name	Lobe
1	lh_bankssts	L	Banks of superior temporal sulcus	
2	lh_caudalanteriorcingulate	L	Caudal anterior cingulate cortex	Frontal
3	lh_caudalmiddlefrontal	L	Caudal middle frontal gyrus	Frontal
4	lh_cuneus	L	Cuneus	Occipital
5	lh_entorhinal	L	Entorhinal cortex	Temporal
6	lh_fusiform	L	Fusiform gyrus	Temporal
7	lh_inferiorparietal	L	Inferior parietal lobule	Parietal
8	lh_inferiortemporal	L	Inferior temporal gyrus	Temporal
9	lh_lateraloccipital	L	Lateral occipital gyrus	Occipital
10	lh_lateralorbitofrontal	L	Lateral orbitofrontal gyrus	Frontal
11	lh_lingual	L	Lingual gyrus	Occipital
12	lh_medialorbitofrontal	L	Medial orbitofrontal gyrus	Frontal
13	lh_middletemporal	L	Middle temporal gyrus	Temporal
14	lh parahippocampal	L	Parahippocampal gyrus	Temporal
15	lh_paracentral	L	Paracentral gyrus	Frontal
16	lh_parsopercularis	L	Pars opercularis	Frontal
17	lh_parsorbitalis	L	Pars orbitalis	Frontal
18	lh_parstriangularis	L	Pars triangularis	Frontal
19	lh_pericalcarine	L	Pericalcarine gyrus	Occipital
20	lh_postcentral	L	Postcentral gyrus	Parietal
21	lh_posteriorcingulate	L	Posterior cingulate cortex	Parietal
22	lh_precentral	L	Precentral gyrus	Frontal
23	lh_precuneus	L	Precuneus	Parietal
24	lh_rostralanteriorcingulate	L	Rostral anterior cingulate cortex	Frontal
25	lh_rostralmiddlefrontal	L	Rostral middle frontal gyrus	Frontal
26	lh_superiorfrontal	L	Superior frontal gyrus	Frontal
27	lh_superiorparietal	L	Superior parietal lobule	Parietal
28	lh_superiortemporal	L	Superior temporal gyrus	Temporal
29	lh_supramarginal	L	Supramarginal gyrus	Parietal
30	lh_frontalpole	L	Frontal pole	Frontal
31	lh_temporalpole	L	Temporal pole	Temporal
32	lh_transversetemporal	L	Transverse temporal gyrus	Temporal
33	lh_insula	L	Insula	
34	lh_isthmuscingulate	L	Isthmus cingulate	
35	rh_bankssts	R	Banks of superior temporal sulcus	
36	rh_caudalanteriorcingulate	R	Caudal anterior cingulate cortex	Frontal
37	rh_caudalmiddlefrontal	R	Caudal middle frontal gyrus	Frontal
38	rh_cuneus	R	Cuneus	Occipital

39	rh_entorhinal	R	Entorhinal cortex	Temporal
40	rh_fusiform	R	Fusiform gyrus	Temporal
41	rh_inferiorparietal	R	Inferior parietal lobule	Parietal
42	rh_inferiortemporal	R	Inferior temporal gyrus	Temporal
43	rh_lateraloccipital	R	Lateral occipital gyrus	Occipital
44	rh_lateralorbitofrontal	R	Lateral orbitofrontal gyrus	Frontal
45	rh_lingual	R	Lingual gyrus	Occipital
46	rh_medialorbitofrontal	R	Medial orbitofrontal gyrus	Frontal
47	rh_middletemporal	R	Middle temporal gyrus	Temporal
48	rh parahippocampal	R	Parahippocampal gyrus	Temporal
49	rh_paracentral	R	Paracentral gyrus	Frontal
50	rh_parsopercularis	R	Pars opercularis	Frontal
51	rh_parsorbitalis	R	Pars orbitalis	Frontal
52	rh_parstriangularis	R	Pars triangularis	Frontal
53	rh_pericalcarine	R	Pericalcarine gyrus	Occipital
54	rh_postcentral	R	Postcentral gyrus	Parietal
55	rh_posteriorcingulate	R	Posterior cingulate cortex	Parietal
56	rh_precentral	R	Precentral gyrus	Frontal
57	rh_precuneus	R	Precuneus	Parietal
58	rh_rostralanteriorcingulate	R	Rostral anterior cingulate cortex	Frontal
59	rh_rostralmiddlefrontal	R	Rostral middle frontal gyrus	Frontal
60	rh_superiorfrontal	R	Superior frontal gyrus	Frontal
61	rh_superiorparietal	R	Superior parietal lobule	Parietal
62	rh_superiortemporal	R	Superior temporal gyrus	Temporal
63	rh_supramarginal	R	Supramarginal gyrus	Parietal
64	rh_frontalpole	R	Frontal pole	Frontal
65	rh_temporalpole	R	Temporal pole	Temporal
66	rh_transversetemporal	R	Transverse temporal gyrus	Temporal
67	rh_insula	R	Insula	
68	rh_isthmuscingulate	R	Isthmus cingulate	
Subcortical regions				
69	lh_thalamus	L	Thalamus	
70	lh_hippocampus	L	Hippocampus	
71	lh_caudate	L	Caudate nucleus	
72	lh_accumbens	L	Nucleus Accumbens	
73	lh_pallidum	L	Pallidum	
74	lh_putamen	L	Putamen	
75	lh_amygdala	L	Amygdala	
76	lh_lateral_ventricle	L	Lateral ventricles	
77	rh_thalamus	R	Thalamus	
78	rh_hippocampus	R	Hippocampus	
79	rh_caudate	R	Caudate nucleus	
80	rh_accumbens	R	Nucleus Accumbens	
81	rh_pallidum	R	Pallidum	

82	rh_putamen	R	Putamen	
83	rh_amygdala	R	Amygdala	
84	rh_lateral_ventricle	R	Lateral ventricles	

Supplementary Table S2. Brain morphometric characteristics for the three cohorts

Label Name	HCP	Cam-CAN	IXI
	Mean \pm SD (min, max)	Mean \pm SD (min, max)	Mean \pm SD (min, max)
Cortical thickness			
lh_bankssts	2.68 \pm 0.14 (1.82, 3.04)	2.57 \pm 0.17 (1.31, 3.05)	2.42 \pm 0.19 (1.4, 2.9)

Supplementary Table S3. Sample and demographic information for the three cohorts used for brain age prediction

Cohort	Sample size	Males/Females	Age range (mean \pm SD)
Datasets used in the training set			
HCP	890	403/487	28.79 \pm 3.70
Cam-CAN	500	249/251	54.40 \pm 18.26
IXI	453	200/253	48.13 \pm 16.54
Hold-out test datasets			
HCP	223	104/119	28.85 \pm 3.69
Cam-CAN	101	50/51	54.38 \pm 17.51
IXI	114	51/63	48.85 \pm 16.32

Supplementary Table S4. List of the top 20 regional features by mean absolute SHAP value for the HCP cohort.

Least Absolute Shrinkage and Selection Operator (Lasso) Regression	
Feature	SHAP value
Total intracranial volume	1.2464
Right inferior parietal lobule surface area	0.4976
Left pallidum volume	0.3981
Left superior frontal gyrus cortical thickness	0.3069
Right putamen volume	0.2946
Right middle temporal gyrus surface area	0.2569
Left inferior temporal gyrus cortical thickness	0.2536
Left lateral orbitofrontal gyrus surface area	0.2401
Left posterior cingulate cortex cortical thickness	0.2303
Left caudal middle frontal gyrus cortical thickness	0.2234
Left superior frontal gyrus surface area	0.2227
Left pericalcarine gyrus surface area	0.2013
Left pars triangularis cortical thickness	0.2001
Left middle temporal gyrus surface area	0.1948
Right frontal pole surface area	0.1914
Right insula cortical thickness	0.1860
Left lingual gyrus cortical thickness	0.1784
Right insula surface area	0.1770
Right hippocampus volume	0.1696
Left precuneus surface area	0.1618
Gaussian Process Regression	
Feature	SHAP value
Total intracranial volume	3.4492
Right inferior parietal lobule surface area	0.7329
Left superior frontal gyrus surface area	0.6324
Left superior frontal gyrus cortical thickness	0.6018
Left rostral middle frontal gyrus cortical thickness	0.5512
Left pallidum volume	0.4568
Right putamen volume	0.4552

Supplementary Figure S5. Scatter plots showing correlations of mean absolute SHAP values (feature importance) between models (Lasso, GPR, and GBM) for the (a) HCP, (b) Cam-CAN, and IXI cohorts. Pearson correlations are shown for each association. Lasso = Least Absolute Shrinkage and Selection Operator Regression; GPR = Gaussian Processes Regression; GBM = Gradient Boosting Machine.

The effects of feature selection on regression performance

Feature selection was performed based on the SHAP values (i.e., feature importance) to select an optimal subset of features. We trained each model (i.e., Lasso, Gaussian process regression, and gradient boosting machine) with the top n (from 1 to 153 with a step of 1) feature(s) in the training set and estimated the regression performance on the test with the trained model. For each dataset, we present the results below for the regression performance using top n (from 1 to 153 with a step size of 1) features(s) by each algorithm. We report the MAE values averaged across all cross-validation results.

In the HCP, using the top 38 features, an average MAE was 2.71 in the test set, lower than 2.75, corresponding to the lowest MAE obtained by all 153 features with the Lasso. Gaussian process regression with the top 67 features achieved an average MAE of 2.81 in the test set, which is lower than 2.94, equal to the lowest MAE obtained by all 153 features. Gradient boosting machine with the top 52 features achieved an average MAE value of 2.75 in the test set, lower than 2.84, corresponding to the lowest MAE obtained by all 153 features. In the Cam-CAN, using the top 121 features, an average MAE was 7.11 in the test set, lower than 7.17, corresponding to the lowest MAE obtained by all 153 features with the Lasso. Gaussian process regression with the top 27 features achieved an average MAE of 7.18 in the test set, which is lower than 7.71, equal to the lowest MAE obtained by all 153 features. Gradient boosting machine with the top 75 features achieved an average MAE value of 7.37 in the test set, lower than 7.92 corresponding to the lowest MAE obtained by all 153 features. In the IXI, using the top 78 features, an average MAE was 8.04 in the test set, equal to the lowest MAE obtained by all 153 features with the Lasso. Gaussian process regression with the top 92 features achieved an average MAE of 8.13 in the test set, which is lower than 8.39, equal to the lowest MAE obtained by all 153 features. Gradient boosting machine with the top 31 features achieved an average MAE value of 7.97 in the test set, lower than 8.31, corresponding to the lowest MAE obtained by all 153 features.

We selected the most important features based on the SHAP value and eliminated features with low SHAP values to select an optimal subset of features. Then we investigated the effects of feature selections on algorithm performance. Our results demonstrate that feature selection improves the performance of each algorithm in brain age prediction

Supplementary Figure S6. Average accuracies (mean absolute error, MAE) of different feature dimensionality in the test sets for each algorithm (Lasso, Gaussian process regression, and gradient boosting machine) in the HCP (top), Cam-CAN (middle), and IXI (bottom).
