

Figure S1. Immunoblot analysis on effect of 8,9-DNP on p-p70S6K, p-4EBP1, p62, and LC3 in A549 cells: (a) Cells in NDM were treated with various concentrations of 8,9-DNP for 3 h, and cell extracts were probed for indicated proteins; (b) Cells in NDM were treated with various concentrations of 8,9-DNP in the presence of chloroquine (CQ, 50 μ M) for 3 h, and cell extracts were probed for indicated proteins.
