

Supplementary Information

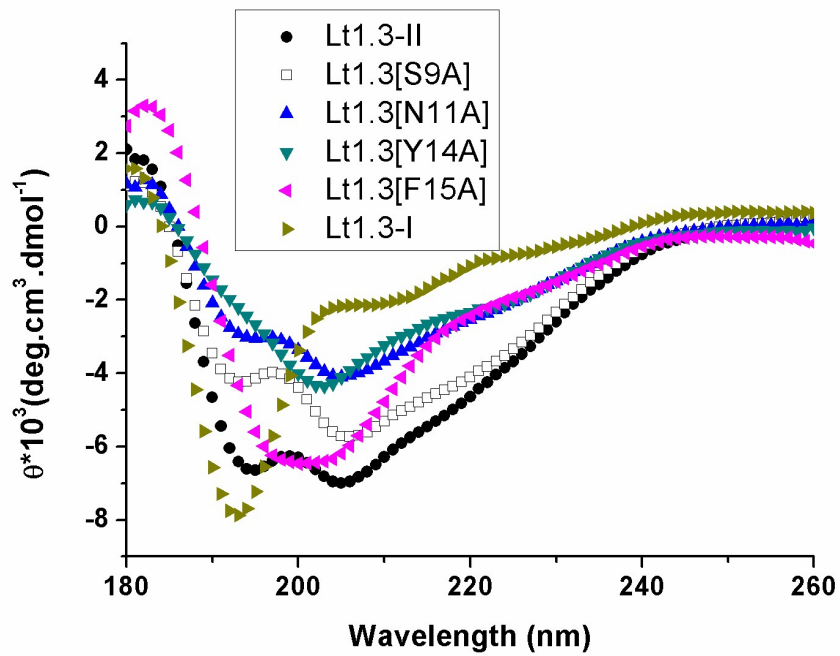

Figure S1. CD spectra of Lt1.3 in 0.01 M phosphate buffer solution (pH=7.2)

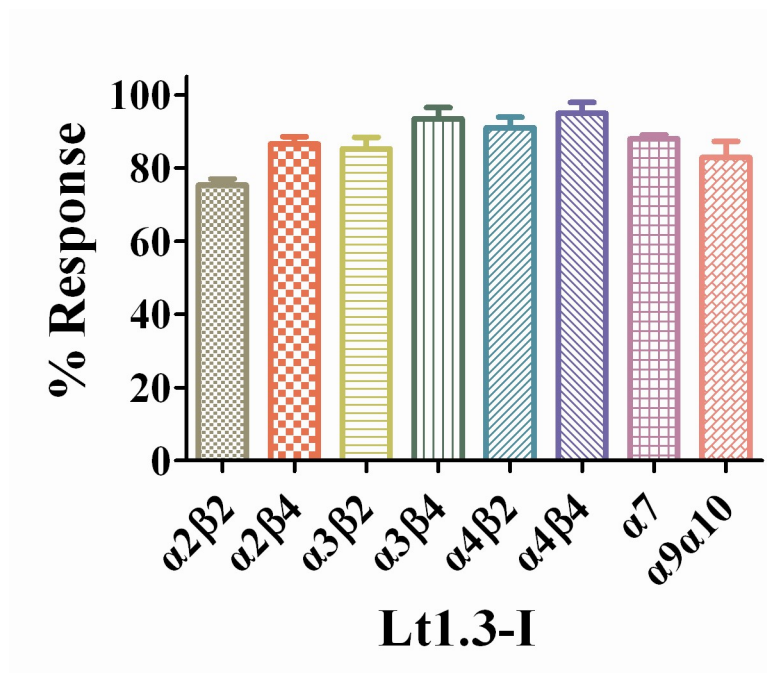

Figure S2. Effects of Lt1.3-1 on rat nAChRs expressed in *Xenopus Oocytes*. **The** inhibition ration of 10 μ M Lt1.3-I for various rat nAChR subtypes was $< 50\%$ (n = 3-4). The data were expressed as mean \pm SEM.
