## Blocking the Wnt/β-Catenin Pathway by Lentivirus-Mediated Short Hairpin RNA Targeting β-Catenin Gene Suppresses Silica-Induced Lung Fibrosis in Mice

**Figure S1.** Protein level of  $\beta$ -catenin in the silica-treated MLE-12 cells at each time point.

**Figure S2.** Immunohistochemical staining for collagen I, collagen III, MMP2 and MMP9 at each time point ( $\times$  400).
