

Supplementary Materials: The Association between Arrhythmia and *Helicobacter pylori* Infection: A Meta-Analysis of Case-Control Studies

Jin Yan, Qiang She, Yifeng Zhang, Chang Cui and Guoxin Zhang

Table S1. The demographic characteristics of the populations of the studies.

Author	Group	Mean Age (Year)	Gender (Proportion of Man)
Badran et al. [16]	AF	62 ± 4	54.88%
	Control	66 ± 3	60.00%
Bunch et al. [17]	AF	70.9 ± 9.5	75.90%
	Control	63.9 ± 10.7	76.67%
Lunetta et al. [18]	NG	NG	NG
	NG	NG	NG
Platonov et al. [10]	AF	69.6 ± 8.3	68.06%
	Control	69.8 ± 7.5	72.22%
Ki et al. [19]	AF	61.28 ± 1.35	61.67%
	Control	50.64 ± 2.18	41.67%
Franceschi et al. [9]	IA	44 ± 17	74.07%
	Control	45 ± 9	68.00%
Wang et al. [20]	AF	63.8 ± 10.8	38.60%
	Control	60.2 ± 10.65	51.52%

AF, atrial fibrillation; IA, idiopathic dysrhythmias; NG, not given.
