

Table S.3.1. Model items, descriptive and correlation statistics

Construct/Items		Description	Mean	S.D.	Skewness	Kurtosis	VIF
Trust in others (TRU)							
TRU1	Other CBD users are trustworthy		3.00	0.055	-1.298	2.165	2.727
TRU3	Other CBD users usually keep my best interests in mind		2.98	0.054	-1.203	2.120	2.725
Modern lifestyle (MLS)							
MLS1	To me, CBD represents an up-to-date life style		3.75	0.068	-1.061	1.106	1.932
MLS3	CBD is in tune with the times		4.05	0.061	-1.583	1.988	1.937
Attitudes (ATT)							
ATT1	Using CBD is a good idea		4.12	0.061	-1.384	2.141	3.591
ATT2	Using CBD is a wise idea		3.94	0.063	-1.046	1.325	3.708
ATT4	Using CBD is pleasant		3.43	0.057	-0.408	1.230	1.554
Subjective Norm (SBN)							
SBN1	People who are important to me think that I should participate in CBD		3.15	0.064	-0.495	0.463	2.325
SBN3	People whose opinions I value prefer that I participate in CBD		3.09	0.059	-0.481	0.907	2.331
Perceived behavioral control (PBC)							
PBC1	I am able to use CBD		3.68	0.070	-0.969	0.702	1.731
PBC2	Using CBD is entirely within my control		3.20	0.073	-0.345	-0.467	1.732
Intention of collaborative donation (ICB)							
ICD1	I intend to use CBD in the future		3.66	0.069	-0.869	0.467	1.813
ICD2	I will always try to use CBD in my daily life		3.18	0.062	-0.482	0.391	1.810
Collaborative blood donation (CBD)							
CBD1	I am familiar with CBD		2.14	0.076	0.884	-0.384	2.684

CBD2	I have experience with CBD	1.81	0.069	1.334	0.944	2.687
------	----------------------------	------	-------	-------	-------	-------

Notes: CBS: Collaborative Blood Donation. N=302. Items measures based on 5-points Likert scale: 1 = strongly disagree; 2 = disagree; 3 = neither agree nor disagree; 4 = agree; 5 = strongly agree
