The Tropical Forestry Handbook [1] has been prepared by professionals that are dedicated to the protection and the sustainable management of tropical forests. They want to make their expertise available for a wide audience. Their contributions provide valuable insight in sustainable tropical forest management. It is our hope, that the Tropical Forestry Handbook will become a helpful tool for mastering the current and future challenges of tropical forests. It is our hope that this book acquires a liking for young people especially. And it is our hope that readers join us and will not be released ever again from the miscellany, uniqueness and fascination of tropical forests.

Table of Contents
