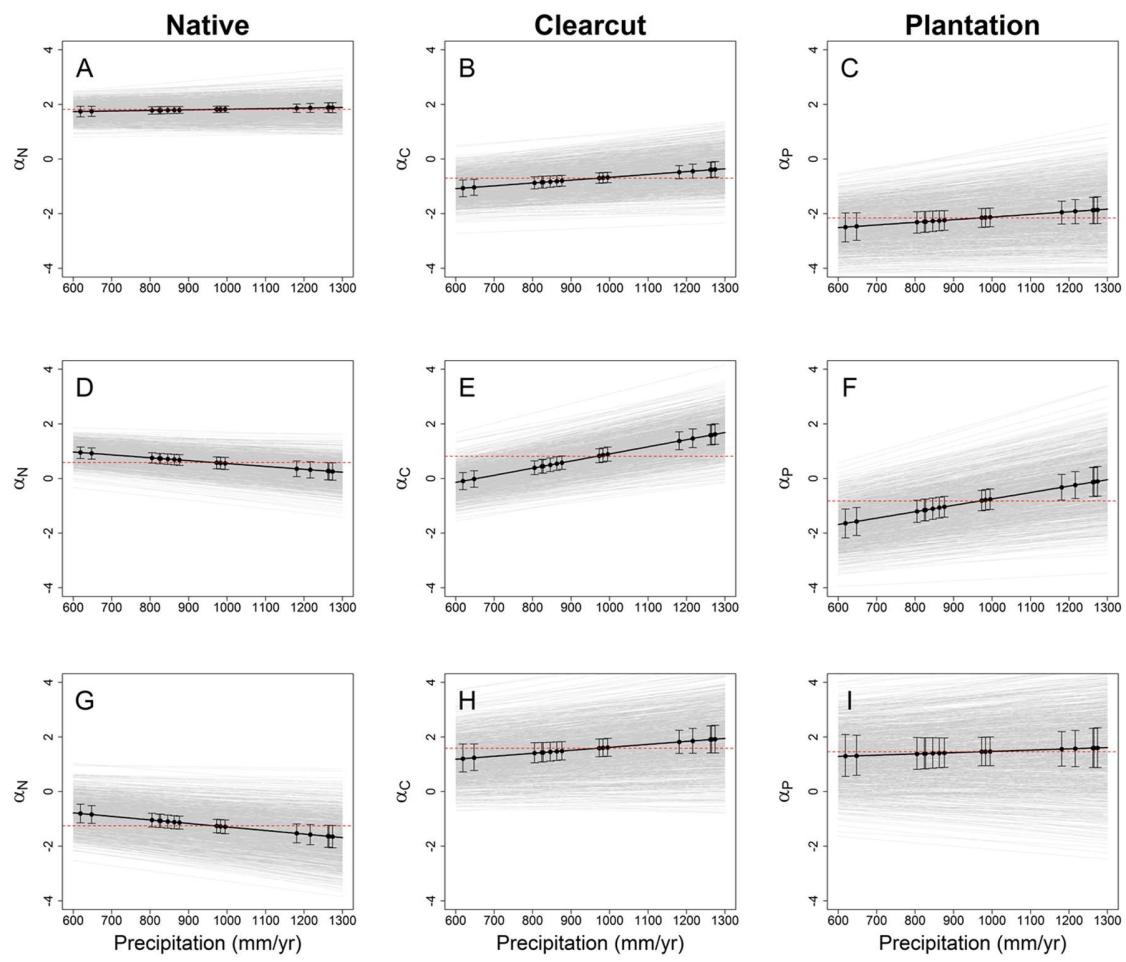

Figure S1. Effect size of each land use type (native (α_N), clearcut (α_C), and plantation (α_P)) at each precipitation level for native richness (A-C), nonnative richness (D-F) and proportion of nonnative richness (G-I). Black points are the estimated parameters for each site with credible intervals of 95% (95 IC). Black lines represent the hierarchical linear model of the estimated parameters against precipitation. Red line is the average effect of the land use type along the precipitation gradient. Effect sizes of clearcut and plantation communities are relative to the native community. Effect sizes were considered ecologically relevant when 95 IC did not overlap with zero.

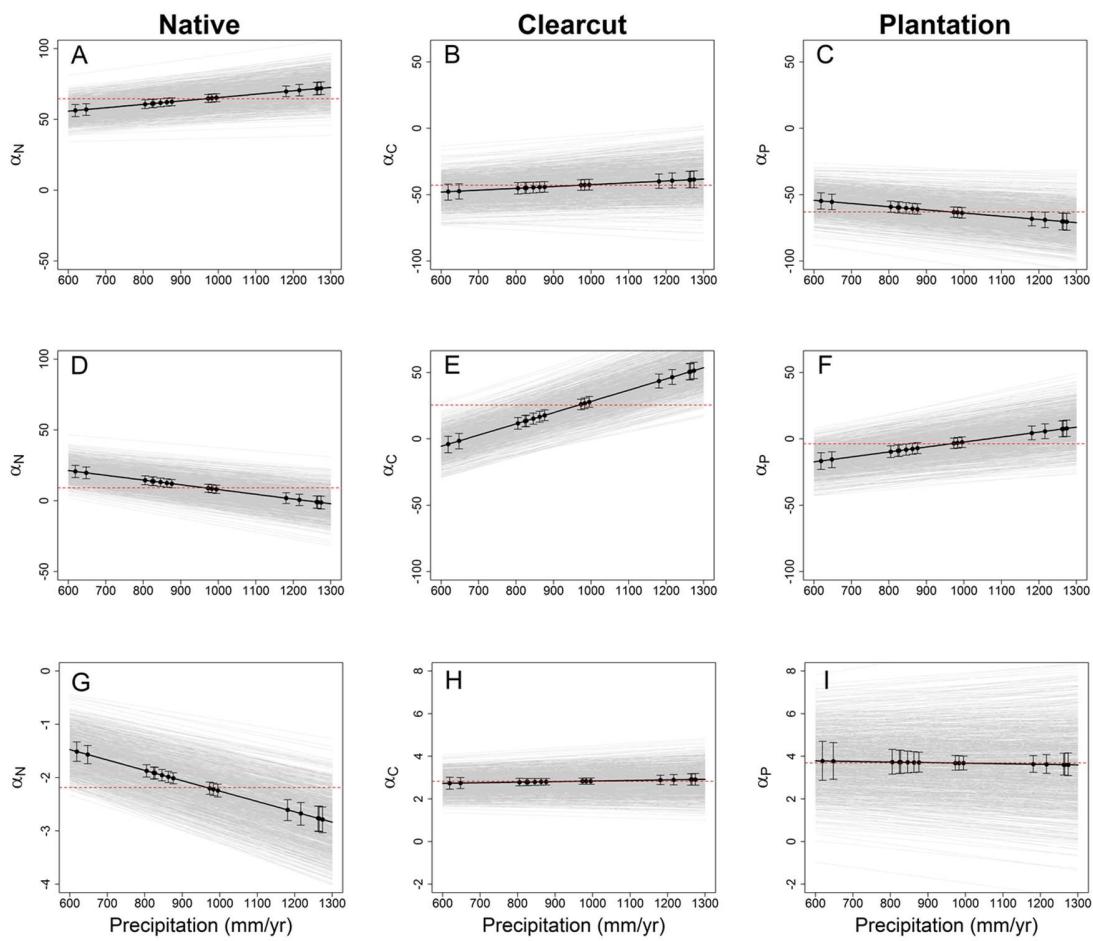

Figure S2. Effect size of each land use type (native (α_N), clearcut (α_C), and plantation (α_P)) at each precipitation level for native cover (A-C), nonnative cover (D-F) and proportion of nonnative cover (G-I). Black points are the estimated parameters for each site with credible intervals of 95% (95 IC). The black line represents the hierarchical linear model of the estimated parameters against precipitation. The red line is the average effect of the land use type along the precipitation gradient. Effect sizes of clearcut and plantation communities are relative to the native community. Effect sizes were considered ecologically relevant when 95 IC did not overlap with zero.

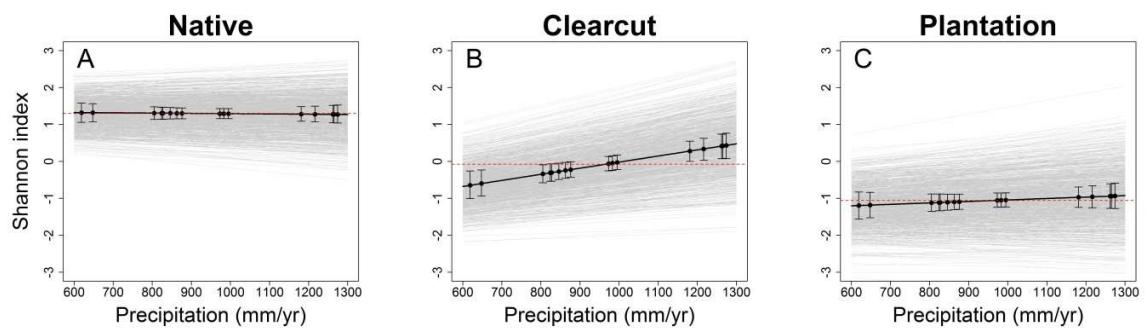

Figure S3. Effect size of each land use type (native, clearcut, and plantation) at each precipitation level for Shannon diversity index. Black points are the estimated parameters for each site with credible intervals of 95% (95 CI). The black line represents the hierarchical linear model of the estimated parameters against precipitation. The red line is the average effect of the land use type along the precipitation gradient. Effect sizes were considered ecologically relevant when 95 CI did not overlap with zero. Effect sizes of clearcut and plantation communities are relative to the native community.

Table S2. Species cover (%) in 4 m² at each land use type at each site.

Sites	Land-Use Type	Species	Cover (%)
AA 1	Clearcut	<i>Acaena splendens</i>	1.5
AA 1	Native	<i>Adesmia boroniooides</i>	1.5
AA 1	Native	<i>Berberis microphylla</i>	9.5
AA 1	Native	<i>Crataegus monogyna</i>	15
AA 1	Native	<i>Nothofagus antarctica</i>	67.5
AA 1	Native	<i>Berberis microphylla</i>	15
AA 1	Native	<i>Nothofagus antarctica</i>	65
AA 1	Native	<i>Senecio bracteolatus</i>	1.5
AA 1	Native	<i>Berberis microphylla</i>	3.75
AA 1	Native	<i>Crataegus monogyna</i>	2.75
AA 1	Native	<i>Nothofagus antarctica</i>	28.75
AA 1	Native	<i>Senecio bracteolatus</i>	1
AA 1	Plantation	<i>Anemone multifida</i>	1
AA 1	Plantation	<i>Berberis trigona</i>	6
AA 1	Plantation	<i>Rhodophiala mendocina</i>	0.5
AA 1	Plantation	<i>Acaena splendens</i>	2
AA 2	Clearcut	<i>Pinus ponderosa</i>	1.25
AA 2	Clearcut	<i>Pinus ponderosa</i>	8.25
AA 2	Clearcut	<i>Taraxacum officinale</i>	1.25
AA 2	Clearcut	<i>Epilobium brachycarpum</i>	0.5
AA 2	Clearcut	<i>Pinus ponderosa</i>	28.75
AA 2	Clearcut	<i>Pseudognaphalium viravira</i>	0.75
AA 2	Clearcut	<i>Senecio bracteolatus</i>	5
AA 2	Clearcut	<i>Taraxacum officinale</i>	0.75
AA 2	Native	<i>Acaena splendens</i>	2
AA 2	Native	<i>Adesmia boroniooides</i>	6.25
AA 2	Native	<i>Amelichloa brevipes</i>	15
AA 2	Native	<i>Azorella prolifera</i>	0.75
AA 2	Native	<i>Berberis microphylla</i>	71.25
AA 2	Native	<i>Bromus setifolius</i>	1.5
