Sample: 0.5 mg/mL SH-PEC

Sample: 1.0 mg/mL SH-PEC

3.0 Photothermal assays

Temperature versus time recorded during the laser irradiation cycles (Figure 2 A, C, E, G, and I). These experimental data were adjusted to Roper equation ($\eta = \frac{hS(T_{eq}-T_{surr})-Q_0}{P(1-10^{-A_{808}})}$) to determine the photothermal conversion efficiency (η) of the AuNRs stabilized with different concentrations of SH-PEC.
