Remote Sensing of Secchi Depth in Highly Turbid Lake Waters and Its Application with MERIS Data

Xiaohan Liu [1,2,3], Zhongping Lee [2], Yunlin Zhang [1,*], Junfang Lin [3,4], Kun Shi [1], Yongqiang Zhou [1], Boqiang Qin [1] and Zhaohua Sun [5]
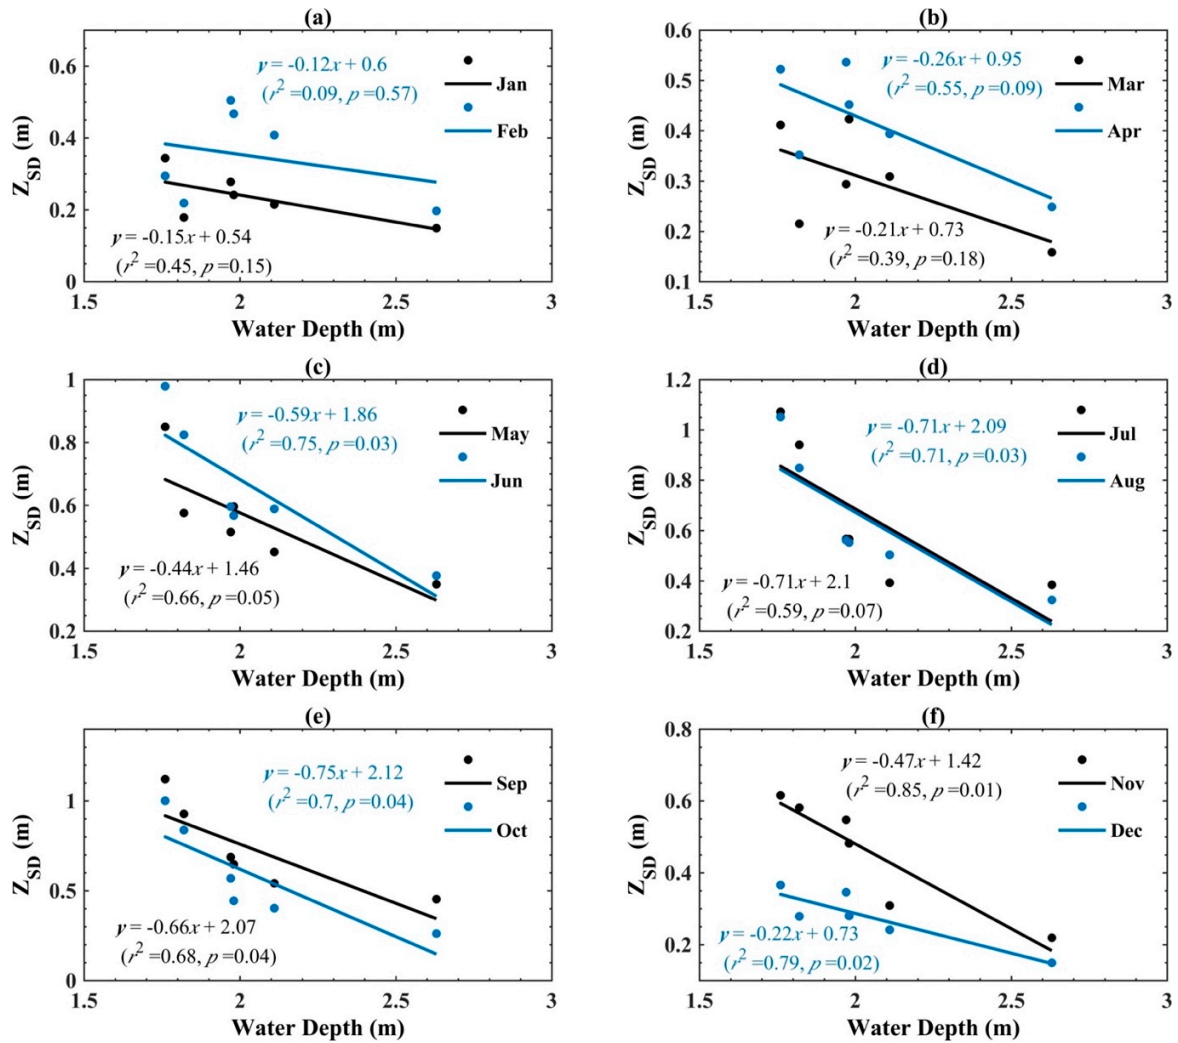

Figure S1. Correlation between monthly average Z_{SD} and mean water depth in six different regions. The mean depth in each region is: East Lake Taihu (1.76 m), Xukou Bay (1.82 m), Zhushan Bay (1.97 m), Gonghu Bay (1.98 m), Meiliang Bay (2.11 m) and the Open Area (2.63 m).
