

Figure S2. Scatterplots of fuzzy model outputs (SIF_{fuzzy}) and original SIFs (SIF_{760} and SIF_{687}) were determined based on *HyPlant* airborne data. A & B – SIF_{fuzzy} expressed by $f(NDVI+EVI+PRI)$ under model C5; C & D - SIF_{fuzzy} expressed by $f(NDVI+EVI)$ under model C1; E & F - SIF_{fuzzy} expressed by $f(SR+EVI)$ under model C2. Standard deviations are represented in error bars. The letter abbreviations correspond to the codes of vegetation groups presented in Figure S2.
