

Supplementary Materials: Spatiotemporal Variability of Land Surface Phenology in China from 2001–2014

Zhaohui Luo and Shixiao Yu

Table S1. Table 1 Unchanged percentage of different vegetation types in China over 2001–2009.

Vegetation types	Percentage
evergreen needle-leaf forest	52.977%
evergreen broadleaf forest	70.183%
deciduous needle-leaf forest	54.324%
deciduous broadleaf forest	51.966%
shrubs	86.670%
grassland	85.375%
cropland	77.736%

Table S2. Root mean square error (RMSE), Akaike's Information Criterion (AIC), and Bayesian Information Criterion (BIC) values for the four methods of analyzing the Moderate Resolution Imaging Spectroradiometer (MODIS) enhanced vegetation index (EVI) time-series data from 2001 to 2014 in China (best-smoothing method shown in bold).

Evaluation Index	Year	Smoothing Methods			
		A-G	S-G	D-L	Hants
RMSE	2001	0.01497	0.01453	0.01468	0.03316

Table S1. Site characteristics of field observations that validate remote sensing estimation.

Site Name	Region	Longitude (°)	Latitude (°)	Vegetation Type	SOS (DOY)	EOS (DOY)	Year	Reference
Hohhot	Northern China	111.75	40.84	grassland	113.0	277.0	2000–2009	[1]
Songyuan	Northern China	124.82	45.14	grassland	125.0	-	2000–2007	[2]
Qianguo	Northern China	124.83	45.11	grassland	113.0	282.0	2000–2007	[2]
Yushu	Northern China	126.53	44.84	grassland	110.0	282.0	2000–2007	[2]
Dunhua	Northern China	128.23	43.37	grassland	121.0	-	2000–2007	[2]
Huadian	Northern China	126.74	42.97	grassland	116.0	-	2000–2007	[2]
Kongtong	Northern China	106.66	35.43	forest	101.0	-	2000–2008	[3]
Qumalai	The Tibetan Plateau	95.80	34.13	grassland	139.0	-	2000–2010	[4]
Hunan	Northern China	101.06	34.73	grassland	120.0	-	2000–2010	[4]
Wushenzhao	Northern China	109.03	39.10	grassland	112.3	-	2000–2009	[5]
Wuchuang	Northern China	111.45	41.09	forest	130.0	-	2000–2007	[6]
Qinghai	The Tibetan Plateau	95.78	34.13	grassland	115.4	-	2000–2007	[7]
Qinghai	The Tibetan Plateau	101.23	36.68	grassland	-	287.4	2001–2007	[7]
Qinghai	The Tibetan Plateau	101.62	37.78	grassland	-	289.9	2001–2007	[7]
Laiyang	Northern China	120.71	36.98	forest	91.7	-	2000–2009	[8]
Liaochen	Northern China	115.98	36.46	forest	97.8	-	2000–2009	[8]
Changlin	Northern China	123.96	44.27	grassland	-	287.0	2000–2007	[2]
Yanji	Northern China	129.50	42.89	grassland	-	276.0	2000–2007	[2]
Zhalangtun	Northern China	122.75	47.98	forest	-	295.0	2000–2006	[9]
Bayaertu	Northern China	108.57	41.52	forest	-	294.0	2000–2007	[9]
Tuquan	Northern China	121.55	45.39	forest	-	290.0	2000–2008	[9]
Wengniuteqi	Northern China	118.91	42.61	forest	-	307.0	2000–2009	[9]
Taipusiqi	Northern China	115.28	41.90	forest	-	291.0	2000–2010	[9]
Chayouzhongqi	Northern China	112.62	41.27	forest	-	293.0	2000–2011	[9]
Wuchuang	Northern China	111.45	41.09	forest	-	293.0	2000–2007	[7]
Guyang	Northern China	110.06	41.02	forest	-	298.0	2000–2006	[9]
Zhunge'erqi	Northern China	111.22	39.87	forest	-	299.0	2000–2006	[9]
Wulateqianqi	Northern China	109.22	40.64	forest	-	298.0	2000–2006	[9]

Xilingol	Northern China	108.52	40.77	forest	-	297.0	2000–2006	[9]
Weifang	Northern China	119.16	36.71	forest	86.9	-	2000–2009	[8]
Wendeng	Northern China	122.00	37.15	forest	88.7	-	2000–2009	[8]
Shanqiu	Northern China	115.65	34.42	forest	102.5	303.0	2000–2005	[10]
Zhumadian	Northern China	114.02	32.98	forest	93.0	313.0	2000–2005	[10]
Yongcheng	Northern China	116.44	33.93	forest	-	301.0	2000–2006	[10]
Tangshan	Northern China	118.02	39.63	forest	-	299.0	2000–2006	[11]
Zhangbei	Northern China	114.70	41.15	forest	129.0	-	2000–2006	[11]
Sanhe	Northern China	117.06	39.97	forest	96.0	-	2000–2006	[11]
Weixian	Northern China	114.53	39.83	forest	113.0	-	2000–2006	[11]
Tanghai	Northern China	118.45	39.27	forest	111.0	286.0	2000–2006	[11]
Fuping	Northern China	114.83	38.85	forest	100.0	288.0	2000–2006	[11]
