The Editorial Office of Remote Sensing wish to report an error in the published paper [1]; Figure 3 was incorrect. The correct figure is as follows:

![Figure 3](image_url)

**Figure 3.** Estimated permittivities, (a) real $\varepsilon'$ and (b) imaginary $\varepsilon''$ part, of all organic samples measured over the entire wetness range $\theta$ and at room temperature (filtered as specified in Section 2.2.3), using a filling factor $\alpha$ for the full tube length (grey) and specifically calibrated for the 4 cm tube insertion depth (red).

We apologize for any inconvenience caused to the readers by this change. The change does not affect the scientific results. The manuscript will be updated and the original will remain available on the article webpage.
