

# Supplementary Materials: Phosphoproteome Analysis Reveals the Molecular Mechanisms Underlying Deoxynivalenol-Induced Intestinal Toxicity in IPEC-J2 Cells

Zhi-Qi Zhang, Song-Bo Wang, Rui-Guo Wang, Wei Zhang, Pei-Long Wang and Xiao-Ou Su

**Figure S1.** Cluster heat map of differentially expressed phosphoproteins regulated by DON exposure in differentiated IPEC-J2 cells. Each column represents a group from three biological replicates (C: Control; T: 20 μM DON). The color codes indicate the average values of the biological replicates.
