^a 125 MHz (δ_c) and 500 MHz (δ_h) in D₂O. ^b 125 MHz (δ_c) and 500 MHz (δ_h) in DMSO-d6.

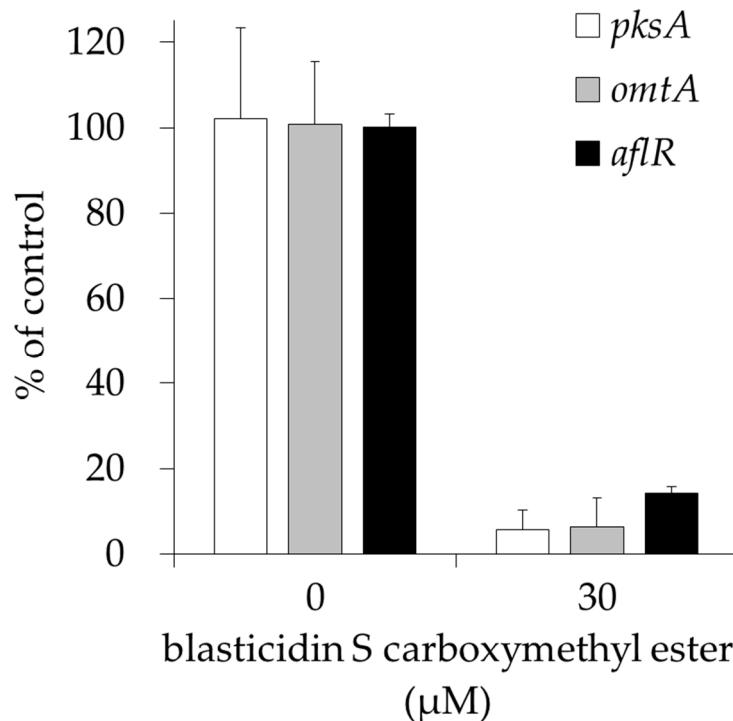

Figure S1. Effect of blasticidin S carboxymethyl ester on the transcription of genes encoding proteins involved in aflatoxin biosynthesis. The mRNA levels of the three genes were analyzed by quantitative PCR according to the method in our previous work [1]. Data are presented as the mean \pm SD ($n = 6$).

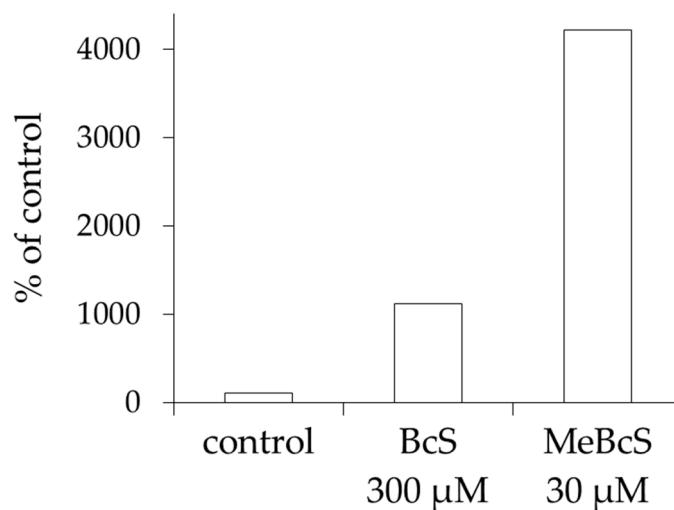

Figure S2. Effect of blasticidin S (BcS) and its carboxymethyl ester (MeBcS) on the transcription of blasticidin S deaminase. The mRNA level was analyzed by quantitative PCR according to the method in our previous work [1]. The primers used were 5'-GGCAGGTTTGCGGGATTG-3' and 5'-CCCCTCCTCCCCCTAAACAAAT-3'. Data are presented as the mean ($n = 2$).
