

Supplementary Materials: Homo-Polymerization of 1-Hexene Catalysed by O^NN^N (Salicylaldimine)Iron(III) Pre-Catalysts to Branched Poly(1-Hexene)

Margaret Yankey, Collins Obuah and James Darkwa

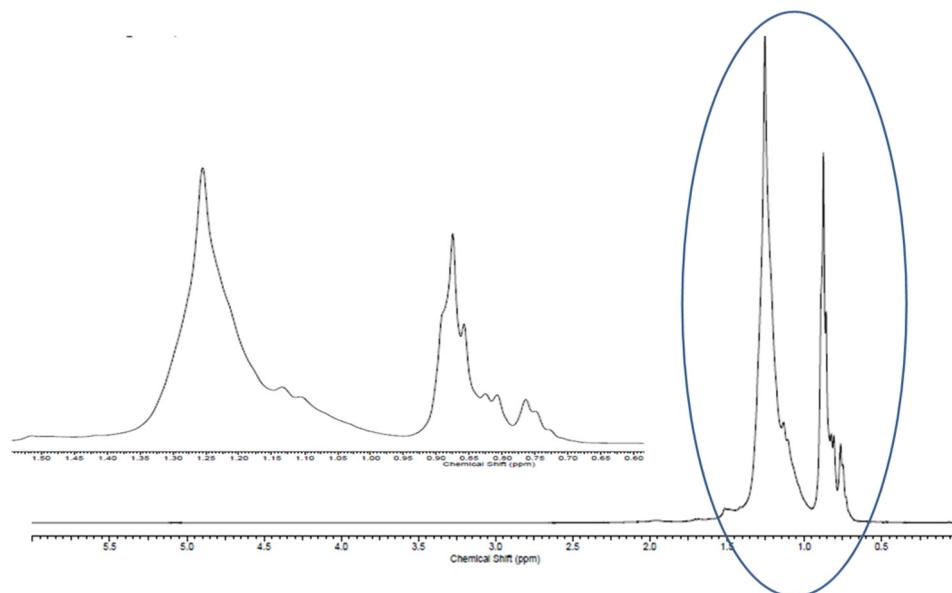

Figure S1. The ¹H NMR spectrum of poly(1-hexene) synthesised using (salicylaldimine)iron(III) pre-catalyst **1** with EtAlCl₂.

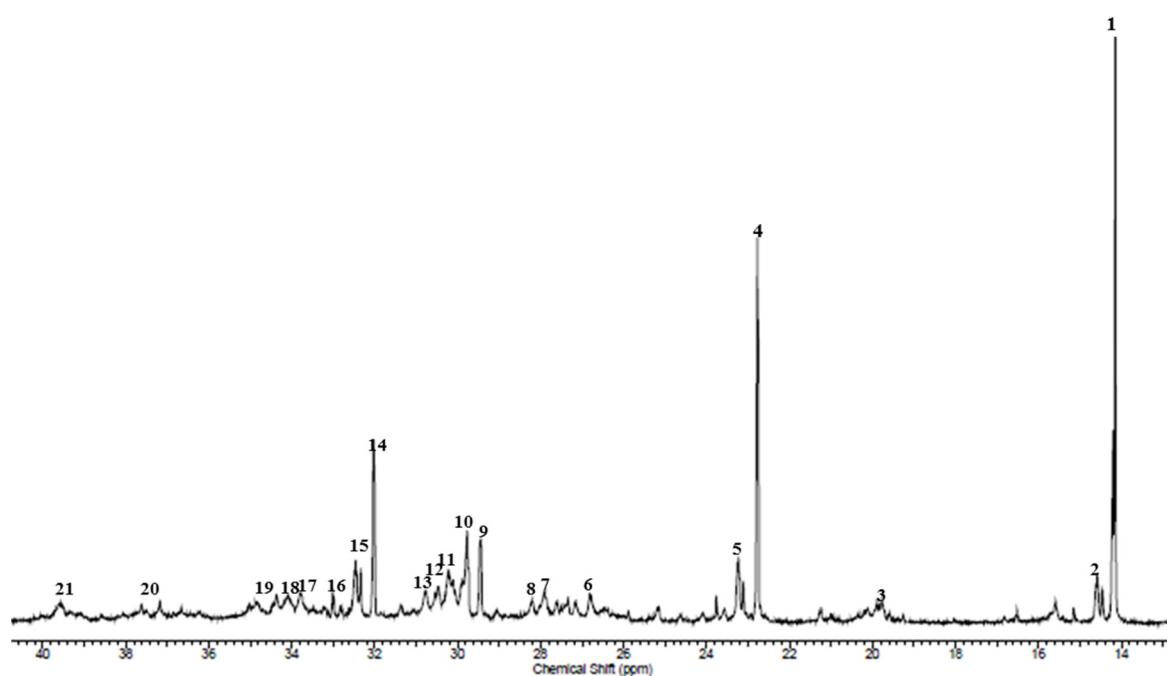

Figure S2. ¹³C{¹H} NMR spectrum of the poly(1-hexene) obtained using (salicylaldimine)iron(III) pre-catalyst **1** (Table 1: entry 7).

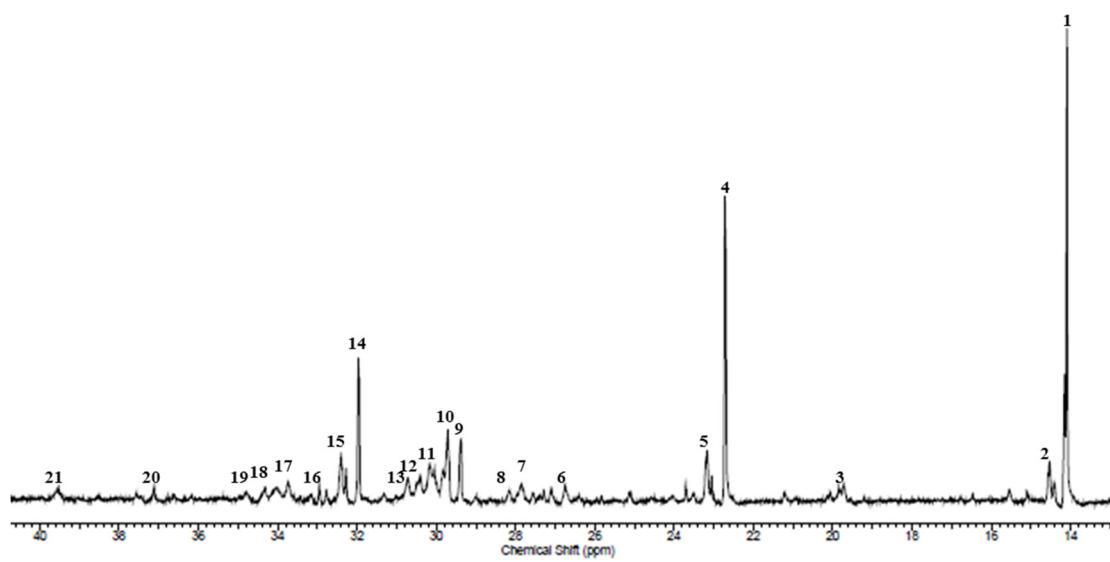

Figure S3. $^{13}\text{C}\{\text{H}\}$ NMR spectrum of the poly(1-hexene) obtained using (salicylaldimine)iron(III) pre-catalyst **1** (Table 1: entry 9).

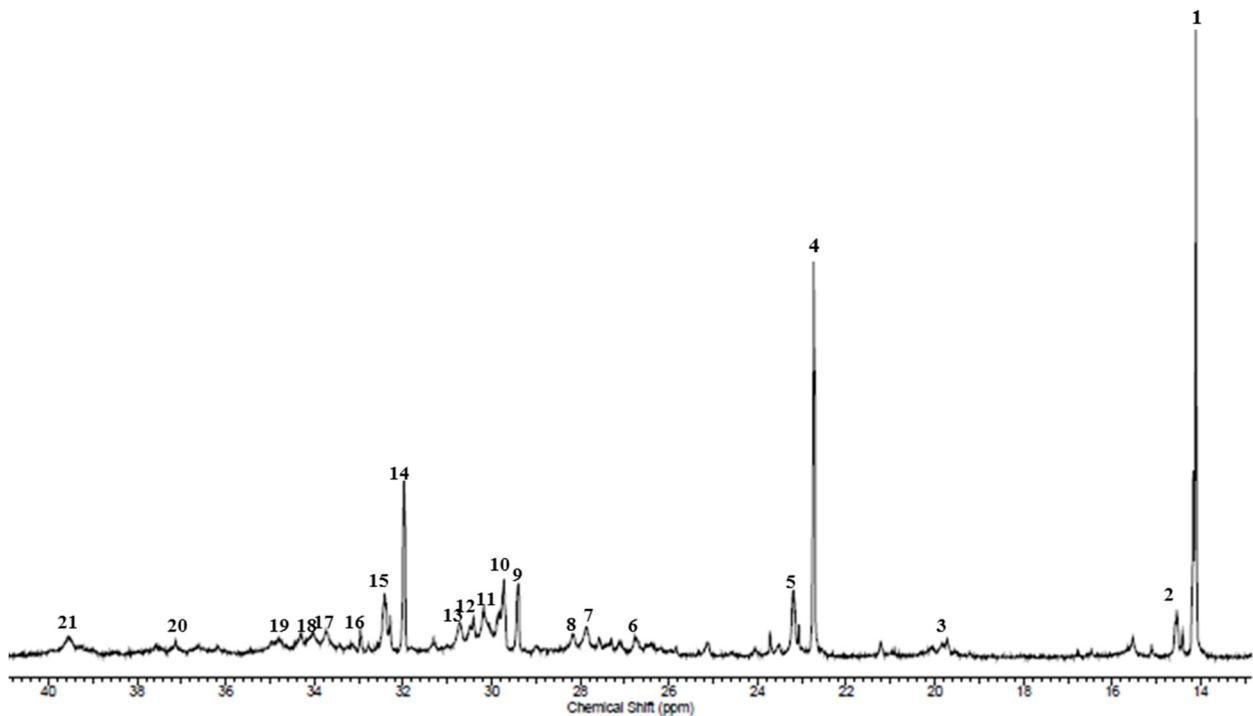

Figure S4. $^{13}\text{C}\{\text{H}\}$ NMR spectrum of the poly(1-hexene) obtained using (salicylaldimine)iron(III) pre-catalyst **1** (Table 1: entry 10).
