**Table S1.** Co-localization of phosphorylated RPS6 with Nestin or CD34 in glioma tissues.

Ave. double-positive cells rate / image (%)	
Nestin + /pRPS6 +	73.15 ± 9.41
CD34 + /pRPS6 +	3.95 ± 2.22

**Figure S1.** Representative pictures of immunohistochemical analysis for RICCS. Images showing immunohistochemical staining for His-tag conjugated ribosome in RICCS.

**Figure S2.** Western blotting showing the stem cell markers, Nestin in U251MG cells. PF4708671 reduced Nestin expression in U251MG cells.

**Figure S3.** Western blotting showing the stem cell markers, Sox2 in RICCS. Sox2 expression in RICCS was down-regulated by PF4708671 treatment.
